Sold everywhere in Canada. In boxes, 25c., 12c.

Love of The Wild

— BY —

ARCHIE P. McKISHNIE

Printed by Special Arrangements with Thos. Allen, Toronto, Ont.

CHAPTER ONE

The hazy October sunlight sifted through the trees and lay, here and there golden bits of carpet on the mossy woodland. A glossy black squirrel paused on one of these splashes of sunlight, and, sitting erect, preened his long fur; then as the harsh scolding of a red squirrel fell on his ears, he sank on all fours again and bounded into the heavy shadows of the wood. A pair of pursuing red squirrels sprang from an opposite grove and with shrill chidings crossed the open to the snake fence. By taking this fence they might intercept the quarry's flight, the object being to make short work of the black, whom they hated with an hereditary hatred harking back to the dim past.

In and out they flashed, their yellow-red bodies painting zigzag streaks of gold upon the forest background of green. Suddenly they halted and with tails slashing angrily poured out a tirade of abuse upon the human frustrator of their designs.

He stood leaning against the fence his young face moody, his eyes focussed somberly on the new schoolhouse with its unpainted boards, hanging to the face of the hill across the creek. He turned now, his tall form erect, accusation in his glance. Nineteen years among the wild of the wild had schooled him in the knowledge of signs such as that which confronted him, and which were forerunners of the tragedies so numerous in the wooded fastness. "So you would, eh? he grated, you little murderers, you."

At the sound of his voice the male squirrel, less courageous than his mate, sprang to earth and scurried up a scraggy beech. The female, not to be cheated out of her wicked pleasure, attempted the old ruse of dropping to the bottom rail of the fence and darting past the boy in this way. But the boy had learned the ways of squirrels as he had learned the ways of all the things of the wild, and as the little animal sprang forward his tall body bent earthward. A muffled squeal came from the buckskin cap he held in his hand, and when he arose his brown fingers nipped the animal securely by the back of its neck.

"So it's you who've been drivin' the black squirrels out of the bush?" he said. "Well, you won't drive any more out, I guess. You've had your last run excet the one me and pup'll give you, and that won't be a very long one. Here, Joe," he called, "come here, old feller; I've got something for you."

From the far end of a long fallow came loping a gaunt Irish setter. He hurled his shaggy form upward, but the boy held the prize out of his reach.

"Come into the clearin' and we'll have a chase, pup," he said. They passed over to an open spot in the wood and the boy turned the captive about so that it faced him.

"Now, Joe," he said, "I'll just——" He broke off and stood gazing at the animal which had ceased to struggle and now hung passive, its little heart throbbing under its white breast-fur.

"Joe," whispered the boy, "she's got young 'uns somewhere."

The dog sprawled on the warm moss and rolled over and over.

"I reckon some little codgers'll be missin' their mammy, pup."

Joe cocked his ears and looked up at his master.

"They'll be lookin' to see her maybe by now,—but," savagely, "'ain't ever goin' to see her no more."

The squirrel twisted and attempted to dig its long yellow teeth into the hand that held it prisoner.

"She's just like everythin' else that has babies," frowned the lad, "savage and foolish. Here you," he called to the dog, "where are you goin', Joe?"

The setter was trotting slowly away.

"What's got into him, I wonder," muttered the young man; "never knowed Joe to run away from sport before, unless it was that time the old she'coon slashed his nose, after we'd cut down her tree and found her babies."

Once more he turned the animal about and looked into its big soft eyes.

"I'm goin' to give you another chance," he said. "Pup don't seem to hanker for your life, and I guess if a dog thinks that way about it I got to think the same way. It's a mighty good thing for you that you've got young 'uns. And now, you thievin, murderin' little devil—get."

He tossed the squirrel on the moss. The frantic thing crouched for a second, then sprang away and sought the sheltering branches of a nearby tree. From this secure refuge she cursed the boy viciously in squirrel language. The boy nodded, then scowled.

"You're quite welcome, I'm sure, he said, and cramming his hands deep into the pockets of his buckskin trousers he walked thoughtfully back to his old post.

Slowly he climbed the fence and perched himself on its topmost rail, his knees drawn up, his chin sunk in his hands. Once more he gazed sombrely across the stumpy clearing to the new schoolhouse on the hill. He hated it; hated the brazen sound of its bell. Mentally he combated it as he combated other elements of civilization. All the young soul of him rebelled against what he considered the defacing of Nature. Those wide swaths which man had mowed through the forest to him meant no advancement. They were scars made by interlopers upon the face of a great sweet mother. Nature had endowed the boy's spirit with her own moods. His soul held the shadows of her quiet places as it retained the records of her swishing songs of trees and waterfalls. He knew no order save that of the great Brotherhood of the Untamed. His was a broad kingdom. It was being usurped and would soon be a toppling power.

Moody and unmoving he sat until the gold splashes crept from the open spaces of the wood and the patches of the yellow-tops of the slashing turned from yellow to bronze-brown and from bronze-brown to gray. A covey of brown quail scurried from a tangled patch of raw-weed to a dry water-run, to scuttle, a long animated line, to the thicket of sumach. Far down in the corner of the fallow another scattered brood were voicing the shrill, mellow call of retreat, and all throughout the darkening wood there sounded the bedley of harmonious voices of wild things in twilight song. Only in the soul of the boy there was a dscord that rose and fell and disturbed and old-time restfulness that had been his for nineteen years. Perhaps the indefinable something that whispered to him pitied him also, for resentment and combativeness sank away from his heart with the hazy glow of day. Like his great Wild that nestled in the peace of twilight, his soul threw off its struggles and seemed to rest. When darkness came he climbed down from the fence. Through the forest-trees murmured the low song of early night-breezes, and to him they voiced a prophecy. Something brushed against him, and the boy bent down and drew the shaggy head of a dog over against his breast.

"Damn 'em," he cried chokingly, and shook a clenched fist towards the swaths of civilization. Then slowly he passed out into the darkness, the dog at his heels.

At the edge of the hill he halted and gazed down the long dark hollow of the creek-bed to where a white splash of water slept beneath the rising moon. All along the wooded vista whip-poor-wills piped their wakeful joy-notes, and the musical whistle of migrating woodcock made a shrill treble note to the harsher wing-song of incoming wild ducks. Dew-mists, laden with the scent of dead leaves and moldy woods, crept to him, and he breathed the sweetness in long, sensuous breaths. But all the while the boy looked toward the bay, and the golden trail of moonlight across it, to the uneven scrag-line of Point aux Pins Forest, and wondered vaguely at the savagery of civilization that sought, as it was seeking, to destroy God's life and beauty.

Outlook in Mesopotamia

Will Take Millions of Money to Restore Country

Maj.-Gen. Sir Chares Townshend, the hero of the siege of Kut-el-Amara, is decidedly against "driving the Turk out of Europe." Sir Charles, however foresees great possibilities for Mesopotamia now that it is in the hands of the British. "It was once," he decalred, "More prosperous than even Canada. It was the granary of the world and it will be so again. It is expected that India will supply a great deal of the labor required for development of the old irrigation system. The remains of the great canals are still there. Of course, it will take millions of money to restore the country."

She. "I think driving is ever so much jollier than motoring."

He: "Why?"

She: "Why, in motoring you have to use both hands to steer."

Living microbes have been found in Manuscripts hundreds of years old.

Golden silence is often more to the point than a silver-tongued oration.

Clothes Helped to Win the War

Bedouin Costumes Part of Plan For Complete Arab Mastery

In one part of the world, and in one important phase of the conflict, it now comes out that clothes played an important part in "winning the war" and these were the clothes in which Colonel Lawrence united the desert tribes against the Turks. It may even be argued that without the clothes the feat could hardly have been accomplished. "The magnificent Bedouin costumes that Lawrence wore much of the time," says Lowell Thomas in Asia, "were not a theatrical pose. They were a carefully worked out part of his plan for complete Arab mastery." Knowing the Arabs as he did, the young English archaeologist had found that the adoption of Arab dress carried the wearer much further into the confidence of the Arabs: but that it must be done completely or not at all, for the Englishman in Arab kit must needs live up to his costume and seem as familiar with Arab life and etiquette as if he had been born with it. It was no splendid masquerade of an adventurous being, as many readers have probably imagined, but rather, as Colonel Lawrence has himself described it, like an "actor in a foreign theatre, playing a part day and night and for an anxious stake." The part had to be "composed" as well as costumed; the audience was an audience of expert observers; and if the actor had at any point seriously failed in his part, the Bedouin tribes could hardly have been held together. Wearing Arab costume himself whenever he was with the tribes, he advised officers unacquainted with Bedouin customs to wear their uniforms. Hats, however, were always better discarded in favor of the Arab headcloth, for Bedouins have a very general prejudice against hats.

Undeveloped Cotton Country

Crops on Large Scattered Areas In Northern Parts Of Australia

While the world outside America is crying out for cotton, that precious commodity is growing wild in Australia's northern territory. In 1881 cotton was grown in Australia's hot north and the seeds were carried by birds and the wind far afield, with the result that there are now crops of cotton on large scattered areas which are, in some cases, 200 miles inland from the coast. Mr. D. Lindsay, who has been surveying the northern territory for the Commonwealth Government, states that the cotton industry could be successfully run there with white labor, and Southern Europeans could settle in the territory with advantage to the country and to themselves. The climate is particularly suited for cotton, he says, and there is sufficient labor to do the picking. Mr. Lindsay has also found good pastoral country where desert was formerly supposed to have existed; and he has discovered that water is freely obtainable over wide areas at comparatively shallow depths. He believes that the northern territory is capable of profitable settlement, and says this unhesitatingly as a man who has been over it from end to end.

The Changing Times

High Prices Bring New Ideas as to Values

How times have changed and in their swing brought new ideas as to values! Or is it that a cycle has been completed and we are back again where our fathers were a few years ago? There is that Indian who sold Belle Isle for a barrel of whiskey. We used to think the poor fellow had been given a very bad deal, but just think how many islands a chap could purchase now with a barrel of old rye. And then there is that man who said that he could have bought Chicago at one time for a pair of boots. Considering the size of Chicago then and the present price of footwear there is nothing so very absurd in the proposition. Authors have placed the rich villain in the grip of his enemies, who have starved him until he is willing to pay a king's ransom for a ham sandwich, but the figures in the transaction do not now appear very far out of line. If the strike is not soon settled, we will all be in a position to gladly give up anything we possess for what was a short time ago a 15-cent lunch.—Detroit Free Press.

Long Distance Wireless at Sea

Such striking results have been obtained by the new long-distance Marconi wireless sets which have been installed on board the Cunarders Imperator, Mauretania, and Carmania, that a rapid extension of these instruments to other great liners may be expected. The famous white star vessels Olympia, Adriatic, Baltic, Celtic, Cedric, and Megantic are being similarly equipped and will carry this new apparatus on their next sailings from England. All these ships will now have direct intercommunication with land over a distance of 1,400 miles.

Lay by a good store of patience and be sure to put it where you can find it.

Earthworms have no eyes but the entire forepart of their bodies is sensitive to light.

While Money is Cheap

Was Never Wasted Right and Left As It Is Now

An American banker heads his newspaper advertising with this statement:

"The cheapest thing today is money. A load of corn, a week's wages, an acre of land will buy more money today than for a long time. While it is cheap, get it and save it. Pay your debts with cheap dollars."

This is worth thinking over. Everybody is talking about high prices, everything is away up, but they forget that money is cheap, common and plentiful. It was never wasted right and left as it is now. A worker can buy about twice as much money with a day's work as he ever could before. It is the one thing that is cheap and plentiful. But no sooner does a man (or woman) get it than it is traded off for those things which are scarce and expensive.

The money that is spent goes cheaply and doesn't buy much, fetches about half its normal value. The money that it saved is of the real old kind, and there's nothing wrong with it at all. Pack some of it away in the savings bank, and it keeps perfectly and draws interest. Use some of it to pay off a permanent debt, and you make the cheap money of today worth as much to you as any money ever was or will be. A worker could now pay off a mortgage on his home with half as many day's work as he could have done five years ago—that is to say, he could do so if he could shape things in such a way that he could let his work apply on the mortgage. But he and his family must live, and that's what costs.

And yet, couldn't a great many people save more than they do? Couldn't a great many more people make hay while the sun of cheap money is shining than they are doing it?—From the Toronto Star.

Agricultural Expansion In British Columbia

Remarkable Growth in Production Is Shown in the Last Ten Years

Ten years ago British Columbia imported foodstuffs equal in value to what it produced. Five years later home production had increased a little more than one hundred percent, and the value of imports had increased only a little more than six and one-half percent, although in the two previous years importation reached a higher level, the year 1914, for instance, standing as the record with an import total of $25,199,125. In 1915 total production was valued at $31,127,801 as against imports valued at $16,434,970. The total production for the year ending December 31 last was nearly $64,000,000, with final returns still to be accounted for, while the value of imported foodstuffs was $22,734,150.

Settlers for Okanagan Valley

There is a steady movement of settlers in the Okanagan Valley this spring and these are a very good class. The estimate of the 1920 production of the Valley is being placed at seven million dollars. The effect of the return of overseas soldiers to the ranches is being felt in the speeding up of production.

Poisoned By Gas While in a Well

FRANK CARLSON FOUND RELIEF IN DODD'S KIDNEY PILLS

Saskatchewan Man Who Suffered All Summer Claims That His New Lease of Health is Due to Dodd's Kidney Pills.

Livelong, Sask., May 24th. (Special) —Most enthusiastic about the benefit he has received from using Dodd's Kidney Pills is Mr. Frank Carlson, a well-known and highly respected resident of this place.

"I was gassed in a well on my farm 25 feet deep," Mr. Carlson says, "I was nearly dead. I was treated for a whole summer for my trouble, but did not get better.

"Then I read in a little almanac about Dodd's Kidney Pills. I had no idea they might benefit me, but was willing to try anything. To my surprise the improvement in my general health was so great, and my kidneys were so much better, that I feel like advising everybody to use Dodd's Kidney Pills. I would not be without them."

Dodd's Kidney Pills are a kidney remedy. They strengthen the kidneys and enable them to do their full work of straining the impurities out of the blood.

Ask your neighbors if Dodd's Kidney Pills are not the sovereign remedy for sick kidneys.

A minister once, in visiting the west met a cowboy, and asked, "What time is it?" "About twelve, sir," was the reply. "Well," the minister said, "I thought it was more." "It never gets any more," says the boy, "it just begins at one again."

"Look here," said the new tenant, "you advertised this place as being near the water. I've looked in every direction and I don't see any water."

"You haven't looked in the cellar yet," the agent told him.

The Queen of Sheba was noted for her skill in solving enigmas.

Demand for Farm Laborers

During the fiscal year just ended the Saskatchewan provincial offices of the Government Employment Bureau placed approximately 42,000 men in positions. At the present time there is an insistent demand for farm laborers throughout the Regina area extending from the Manitoba boundary and down to the Arcola line.

Moose Jaw to Denver

Moose Jaw will be linked up with Denver, Colo., 800 miles distant, by a new auto road, which is to be constructed shortly, known as the Power River Trail.

GIRLS! A MASS OF WAVY, GLEAMY BEAUTIFUL HAIR

Let "Danderine" save and glorify your hair

In a few moments you can transform your plain, dull, flat hair. You can have it abundant, soft, glossy and full of life. Just get at any drug or toilet counter a small bottle of "Danderine" for a few cents. Then moisten a soft cloth with the Danderine and draw this through your hair, taking one small strand at a time. Instantly, yes, immediately, you have doubled the beauty of your hair. It will be a mass, so soft, lustrous, fluffy and so easy to do up. All dust, dirt end excessive oil is removed.

Let Danderine put more life, color, vigor and brightness in your hair. This stimulating tonic will freshen your scalp, check dandruff and falling hair and help your hair to grow long, thick, strong and beautiful.

Canadian Patriotic Fund

At a meeting recently of representatives of the various branches throughout the Dominion of the Canadian Patriotic Fund, the treasurer stated that there was over $7,000,000 on hand. The expenditures were about $125,000 a month, which sum included allowances to various persons who did not come within the regulations of the government pension scheme.

Had ship's anchor fall on my knee and leg and knee swelled up and for six days I could not move it or get help. I then started to use MINARD'S LINIMENT and two bottles relieved me.

PROSPER FERGUSON.

Better Movies

Medium by Which Public Opinion May Make Itself Felt

With nearly three-quarters of a million Canadians attending moving pictures daily, there ought to be on the part of all organizations interested in good citizenship and the training of the young an insistence upon two things; clean plays and the presentation of topical events relating to their own country. It would be childish, of course, to bar news pictures of other lands, but these should not, as is often the case, entirely supersede Canadian events. The men who own or operate the moving-picture shows are not in business for their health alone. A great many of them are anxious to know what their patrons think, and the suggestion box is a feature in their houses. This one medium by which public opinion may make itself felt. Because of its comparatively low prices, the motion picture house has become in many centres a family institution. Its influence will be to a very large extent what the heads of families make it. If they insist on having the best for amusement and well-selected educational features about their own country, they will get them.—Toronto Globe.

Saskatchewan Exporting Eggs

The province of Saskatchewan, at one time a large importer of eggs and poultry, is now sending both to the markets of eastern Canada and the Pacific Coast. According to the commissioner of the board of trade at Regina, 900 cases of eggs were shipped in one week recently, each case containing thirty dozen.

Some of the rooms in Kilkenny castle are almost exactly as they were 800 years ago.

What a delightful flower is the pink of propriety.

Livestock Shows at Chicago and Toronto

Saskatchewan Government to Pay the Transportation Charges On Livestock

On behalf of the Saskatchewan government, the Hon. Chas. A. Dunning has agreed to pay the transportation charges on Saskatchewan livestock entered for the International Livestock Show at Chicago, and the Toronto Royal Exhibition.

It has been decided that a joint exhibit of not over two car loads of Saskatchewan livestock be sent this fall to the two big shows. The minister has agreed to pay transportation charges providing certain conditions were fulfilled, one of which was that no stock should be sent to this exhibit that had not competed in at least one of the four large Saskatchewan shows, namely, Regina, or Saskatoon summer exhibitions or winter fairs.

The result of the conference between the members of the livestock board and the minister was completely satisfactory to the board, and steps will be taken immediately to ensure the earnest and hearty support of the board, in securing the best possible exhibits from the province, well fitted.

Mr. Dunning has also received the following resolution which was unanimously passed at the annual meeting of the livestock board:

"Be it resolved, that this meeting of the Saskatchewan livestock board express its hearty appreciation and commendation of the successful manner in which the provincial minister of agriculture, through his department has handled the serious problems of feed shortage caused by the crop failure last year."

British Columbia Clays

Tests Made Which May Lead to Important Results

A number of clays which were collected from different parts of the province of British Columbia by the geological suvey field staff have been tested in the laboratories of the ceramic division. Some of the clays taken from the vicinty of Ducks and other from the Chimney Bridge Creek on the west side of the Fraser River, withstood high temperatures without softening, and would, therefore, be suitable for the manufacture of firebrick. The silty clays on the Nicola Valley and on the Fraser and Thompson Rivers burn to a red color, whilst those on the Columbia Valley and the Windermere Lakes contain a good deal of lime and burn to buff. While these latter were as a rule useless for fire-clays, they were found to be suitable for making building bricks. Other good clays were found among collections from the neighborhood of Smithers and along the Bulkley River between Hazelton and Telkwa. These discoveries are important, particularly the fire-clays, which are needed in the construction of metallurgical furnaces.

Director of Co-Operation

Mr. J. F. Booth, field representative with the Saskatchewan Department of Agriculture in 1917, and district representative with the department in 1919, has been appointed to succeed W. W. Thomson as director of the co-operative organizations and market branch of the department. Mr. Thomson resigned recently to take charge of the co-operative wool marketing operations of the wool growers of Saskatchewan and Manitoba.

Coal at Lampman

That the coal deposit near Lampman, Sask. is one of the best of its kind in the world, and one of the greatest assets of the province, is the opinion of the investigators who recently made an examination of the location. They estimated that there are 32,000,000 tons of coal in the two and three quarter sections of land on which the coal is located.

Several hundred peaks in the Himalaya range attain a height of 20,000 feet or over.

CUTICURA HEALS ECZEMA

All over baby's face. Came in water blisters and then formed a solid scale. Began to itch and burn so had to bandage his hands as he wanted to scratch. Face was badly disfigured. Trouble lasted 4 months. Began using Cuticura Soap and Ointment. Used one cake Soap and one box Ointment when he was healed.

From signed statement of Mrs. Albert Ellis, Wettenberg, N. S.

For every purpose of the toilet Cuticura Soap, Ointment and Talcum are supreme.

For free sample each of Cuticura Soap, Ointment and Talcum, address post-card: "Cuticura, Dept. X, Boston, U. S. A." Sold everywhere.

Good Prospects for Harvest in France

People May Be Able to Have White Bread

It is a long way to the harvest, but already M. Thoumyre, undersecretary for food supplies, announces that there is a promise of large crops this year. Wheat grown in France had fallen to less than half the pre-war quantities, and the difference had to be imported most from across the Atlantic.

M. Thoumyre now states that, thanks to the efforts of the Wheat Commission, recently got up to stimulate agriculture, and to favorable weather, France will overcome this shortage by August next. There are prospects of white bread at last.

How's This?

We offer $100.00 for any case of catarrh that cannot be cured by HALL'S CATARRH MEDICINE.

HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System.

Sold by druggists for over forty years. Price 75c. Testimonials free.

F. J. Cheney & Co., Toledo, Ohio.

Great Britain Prosperous

Few Immigrants Are Coming From England

There will be little real immigration to Canada within the next year, according to Major Tudghe, of Montreal, secretary of the Salvation Army immigration department. Several hundred people from Great Britain are coming to Canada every week, he said, but the numbers are not nearly so large as before the war, and most of the passengers are soldiers' dependents or Canadians who went to England during the war. Most come out to friends, and not one in twenty is without definite plans.

"England is so prosperous and the wages so high that it would not pay the average working man to change his home," Major Tudghe said. "Coal miners are earning as much as £25 per week, and they would not get that much in Canada."

Lucky Investment

As a result of a ten-shilling investment, Archie C. Bond, a soldier who enlisted in Edmonton, Alta., during the first days of the war, has been handed a cheque for $2,500 sterling, representing the first prize in a "Golden ballot" scheme conducted in England in aid of settlements for disabled soldiers and sailors.

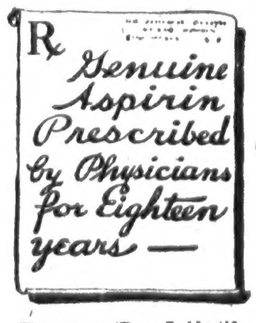

Beautiful Women of Society, during the past seventy years have relied upon it for their distinguished appearance. The soft, refined, pearly white complexion it renders instantly, is always the source of flattering comment.

Gouraud's Oriental Cream

FERD. T. HOPKINS & SON, Montreal

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" identifies the only genuine Aspirin,—the Aspirin prescribed by physicians for over nineteen years and now made in Canada. Always buy an unbroken package of "Bayer Tablets of Aspirin" which contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally. Tin boxes of 12 tablets cost but a few cents. Larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

A Polish for Every Shoe

Preserve Your Shoes

GOLD LEAF

A liquid dressing for ladies' and children's fine shoes. Contains 40 percent animal fat. Penetrates and preserves the leather.

SNOW WHITE

A pure white liquid dressing for canvas shoes, tennis shoes, etc. It dries quickly and does not turn yellow or rub off.

BRITISH M LITARY

A high grade polish, waterproof and not injurious. Gives a high and lasting polish. For black, tan, oxblood and chocolate shoes.

Ask your dealer for these lines. You will get polish satisfaction.

Chinese Are Progressing

Have Become More Civilized During Last Few Years

Dr. Geil has been spending nearly a year in China and studying the Five Holy Peaks, mountains which for three thousand years have been visited by numberless pilgrims. He has returned most impressed with progress made by the Chinese people toward modern civilization during the last few years. The one ambition of the youth of China is to learn English. As for their own intricate writing, a method has been devised which reduces the period of study from several years to a few weeks. Radical changes are taking place, some of which even affect the outward appearance of the people's homes. In some of the provinces an order directs every family to plant a number of trees every year. This is being carried out with such energy that groups of young trees are found even in streets and market places. In his peregrinations Dr. Geil found the natives becoming more and more kindly disposed toward English-speaking visitors. Western thought is a subject of much speculation and interest, with the result that the pilgrimages to the Five Holy Peaks are not so numerous and the old gods are falling into decay.

Minard's Liniment used by Physicians

A Fine Type

Speaking at Orillia, Ont., Sir Arthur Currie said that Canada has developed a distinct race of men, the fusion of the best Anglo-Saxon blood, sons of the pioneers, who were men of brains, mettle and character, resulting in a type of soldier that was in many respects superior to those of any other nationality fighting in the great war.

The battle of Waterloo began and finished in eight hours.

Chains of gold are stronger than chains of iron.

HOW'S YOUR BLOOD?

Pimples and Eruptions Mean Bad Blood

People who have impure or impoverished blood should be careful to take only a temperance remedy made of wild roots and barks, such as Doctor Pierce's Golden Medical Discovery is and has been for nearly 50 years. Ingredients printed on wrapper.

The first day you start to take this reliable medicine, impure germs and accumulations begin to separate in the blood and are then expelled through the eliminative organs.

In place of the impurities, the arteries and veins gradually get fresh vitalized blood and the action of this good blood on the skin means that pimples, boils, carbuncles, eczema, rash, acne and many skin blemishes will disappear. Then you must remember that when the blood is right, the liver, stomach, bowels and kidneys become healthy, active and vigorous and you will have no more trouble with indigestion, backache, headache.

Get Doctor Pierce's Golden Medical Discovery to-day at any medicine dealers, in tablet or liquid form, or send 10c for trial package to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., or branch Laboratory, Bridgeburg, Ont.

BRAMPTON, ONT.—"A few years ago I was in a nervous and run-down condition and felt greatly in need of a tonic. A friend who was being helped by Dr. Pierce's Golden Medical Discovery advised me to try it, too. It helped me from the very start and eventually restored me to perfect health. I feel in a position to praise the 'Golden Medical Discovery' very highly and take pleasure in recommending it to all those who are at all nervous, weak or run-down."—MRS. ESTHER PEATSON.

Two Hundred Millions for Wheat

The Tidy Little Sum Pulled Down By Saskatchewan Farmers For Last Year's Work

According to government figures, slightly over 90,000,000 bushels of wheat were raised in Saskatchewan in the last year. Of this amount, some 10,000,000 bushels were held off the market for seed and other purposes on the farms. The saleable crop amounted, therefore, to approximately 80,000,000 bushels. The wheat board took over the crop from the farmers and made them an initial payment at the rate of $2.15 per bushel, of, approximately $172,000,000. At the same time it gave them certificates entitling them to pro-rata per bushel participation in the final profits made on the resale of the crop by the board. Such certificates at 40 cents per bushel will add another $32,000,000 to the final price to be paid the farmers for the wheat crop, and will bring it up to an approximate total of $204,000,000.

Western Forest Reserves

Patrol Service Over Many Hundreds Of Square Miles of Forest

The Dominion Forest Reserves cover approximately 43,750 square miles, an area twice that of the province of Nova Scotia, or over half that of Manitoba, prior to 1912. These reserves lie in the three prairie provinces and in the railway belt of British Columbia. The Dominion government also maintains a free patrol service over many hundreds of square miles of forest not yet included in the reservations. Before any areas are included in the reserves they are covered by surveys by trained men to ascertain the character of the country from a forester's point of view. A belt of country from the east to the west of the Provinces of Manitoba, Saskatchewan and Alberta, comprising all 145,000 square miles of the northern parts of these provinces has been surveyed. In some respects the survey has been a disappointment, for a comparatively small proportion of the area is found to be covered with timber of any size. Much of it has in the past been badly damaged by fire.

At present, and for some time to come, the development of the forest reserves has meant, and will mean, the expenditure of a large amount of money with only small returns. Roads and trails have to be built so that the products may be taken out and that all parts of the reserve may be accessible in case of fire. Houses must be built for the rangers and telephones must be provided to keep the supervisors in touch with their men. All this work requires years to carry out. However, it has been the experience of countries which have introduced scientific forestry that all expenditure is amply justified.

Indeed, in the present stage, the forests of western Canada are far from being a "gold mine" to the Dominion government. The forestry branch spends annually in Saskatchewan $145,000, and gets $9,000 revenue; in Alberta it spends $200,000 and gets $19,000 revenue.

The area of forest reserves in the prairie provinces may look large, but compared with most European countries the area of the provinces occupied by reserves is small. Belgium, perhaps the most thoroughly cutivated country in the world, has nearly one-fifth of its area in permanent forests. France has about the same proportion. Compare this with Saskatchewan's five percent, Manitoba's 1.66 percent and Alberta's 10 percent. Even British India, one of the most densely populated countries in the world, where forestry has been practiced for half a century, has about one-seventh of its area in forests.

The returns per acre from managed forests, are much greater than from natural forests. The longer an area is kept under forest management the better the returns. In Switzerland there are forests that have been under management for four centuries and they yield a net revenue of $6.20 per acre per year, or at the rate of $992 per quarter-section.

Earl of Minto Ranch

Earl is to Have Purebred Stock on His Alberta Ranch

Thoroughbred horses, pure bred shorthorns and sheep have been ordered by the Earl of Minto, who has recently acquired a ranch in southern Alberta, adjoining that of the Prince of Wales, and intends stocking it with blooded animals from his British estates. It is expected that the stock will arrive within a few weeks.

Although the Earl of Minto, who is at present personally inspecting his new purchase, has not given any information on the point, a report is going around to the effect that plans are also under way for the construction of a ranch house calling for an expenditure of a hundred thousand dollars.

Produce Oil in Britain

Eleven oil wells drilled in Great Britain have produced a hundred thousand gallons of oil.

The balance wheel of an average watch makes 300 vibrations per minute

Manitoba Farm Loans Association

System is Proving of Great Benefit to The Cause of Agriculture

The annual report for 1919 of the Manitoba Farm Loans Association records that during the year 795 applications were received aggregating $2,532,900, whilst new loans were paid out to the sum of $1,220,000. Of the applications received, a considerable proportion, nearly $668,900, were declined or withdrawn for various reasons, nearly all of them have been taken up by the Soldier Settlement Board, the remainder consisting of releases granted by the Board under very exceptional circumstances.

The funds for loaning purposes were, as in the past, for the most part provided by the province, but it is encouraging to note that bonds sold to the public increased from $133,995 to $237,350, and deposits from $25,350 to $63,875 during the period under consideration. In spite of the unsettled condition of the money markets during the year, the association was able to secure loans at five percent to continue loaning at the original rate.

The total amount of money paid out to November 30th, 1919, for loans was $3,320,950, of which $141,014 has been repaid, leaving loans outstanding amounting to $3,079,935, as against $1,990,346 at the same date in 1918. Expenses for the year amounted to $21,374, which is considerably below the one percent originally provided for in the act as being sufficient to run the business. The substantial surplus of $20,403 has been set aside. Collections were very good, only one small arrear outstanding from 1918.

Many appreciative letters have been received from borrowers since the establishment of the association, and there have been on the other hand very few complaints. The Manitoba Farm Loans Act of 1917 provided for the establishment of the association which has power to approve of loans, issue certificates of ownership on shares, issue stocks and bonds, with a capital stock of $1,000,000, of which the province subscribes 50 percent. Money is loaned only to farmers for the acquisition of land, for clearing or draining, the erection of farm buildings, the discharge of liabilities incurred in the improvement of land for agricultural purposes, and only to persons actually engaged in farming activity on the land in question. The farm land itself is taken as security and the borrower automatically becomes a subscriber to the association. The rate of interest on loans is sufficient only to pay interest on securities issued, plus one percent for the expenses of operating. The affairs of the association are superintended by the Manitoba Farm Loans Board, with headquarters at Winnipeg, the Commissioner being appointed by the Lieutenant-Governor in Council, and one member each by the Union of Municipalities and the Grain Growers' Association.

Decay in Rural Life

Prof. Reynolds Speaks Before Brandon Kiwanians

Addressing the Kiwanis club at Brandon, Principal J. B. Reynolds, of Manitoba Agricultural College, said that rural neglect is the reason for the farmers movement now sweeping across Canada. Taking as his subject "The Town Dominant," Professor Reynolds said that the decay in rural life was noticeable not only in Canada but also in many other countries, and he cited several reports.

The nineteenth century is distinguished among the centuries as the era of industrial development and machinery has now replaced hand labor in every industry, and this has resulted in the principle of the division of labor, the relationship between the master and workmen which existed forty years ago disappearing because of the introduction of so much machinery.

In suggesting a remedy for present rural conditions the speaker urged the encouraging of rural organizations for business and even for political purposes, also that agriculture and country life must be fostered by community organizations, rural credit societies and agricultural research in the schools and colleges.

Growth of Alberta

Some idea of the growth of Alberta during the past seven years is indicated in the statistics obtained by the Wrigley Directory, Ltd. This information shows that no less than 598 villages and settlement have been established since 1913. In that year Alberta possessed a total of 1,272 cities, towns and villages, whereas now the province can boast of 1,870.

Hair for the Bald

A French surgeon of the Pasteur Institute claims to have discovered a process by which he can graft hair to the scalp and so make the heads of the bald to blossom like the seven Sutherland sisters. He declares that he has already positively and permanently cured six bachelors of baldness through a slight surgical operation, which is painless and leaves no ill-effects.

The English began their year on December 25, until the time of William the Conqueror.

It takes three-tenths of a second for a signal to pass over the 2,700 miles of the Atlantic cable.

Exhaustion of the Soil

Important Question to be Discussed At Agricultural Conference In Winnipeg

Dates were announced at Winnipeg, Man., for the agricultural conference, under the auspices of the Commission of Conservation, in Winnipeg this summer. The conference which will be attended by officials from every department of agriculture in the prairie provinces, will open on July 14, and close on the 6th. Subjects to be taken up will deal more particularly with the rate and extent of exhaustion of soil fertility throughout the entire west. The proposals of the department to offset the drain of the past five years, during which time every available acre has been utilized for the production of foodstuffs. Special attention is also being paid to conditions in the drought areas. Forage supply and the preventing of soil drifting will also be taken up.

ANAEMIA ROBS ITS VICTIMS BY STEALTH

Conditions of Thin Blood That Could Be Corrected Easily Are Stealing The Health and Energy of Many Men and Women, and Boys and Girls.

Anaemia, which literally means bloodlessness, is one of the most prevalent troubles of the present day. If neglected it is apt to develop into pernicious anaemia, one of the most hopeless diseases. While anaemia attacks men and boys, it is more prevalent among young girls and women and for this reason every woman, particularly every mother, should know how to recognize the signs of this trouble which makes its approach so gradually and so stealthily that it is often far advanced before the nature of the trouble is noticed. One general symptom of anaemia is pallor. The cheeks gradually lose their color, and the lips become pale or white. With this loss of color there comes a tendency to fatigue, a palpitation of the heart, and breathlessness after slight exertion, with occasional headaches. In the more severe cases fainting spells frequently occur.

In ordinary anaemic conditions, including the anaemia that affects young girls in their 'teens, Dr. Williams Pink Pills are all the medicine required. Fresh air, sunlight and nourishing food will do the rest. Any woman or girl taking Dr. Williams Pink Pills can tell by the growing redness of her lips that the pills are making her blood rich and red.

Miss Mable Feener, Liverpool, N. S., says:—"Before I began the use of Dr. Williams Pink Pills I felt like a complete wreck of my former self. My blood was thin and watery; I suffered from faint and dizzy spells, and had headaches almost every day. I was taking doctor's medicine, but it was not helping me and at this time I was learning my trade as a tailoress, and was forced through my illness to give up work. After reading an advertisement of Dr. Williams Pink Pills one day I decided to give the pills a trial. After taking two boxes I felt that I was being benefited, and continued their use until I was fully restored to health. The pills certainly did wonders for me, and I cannot recommend them too highly."

The purpose of Dr. Williams Pink Pills is to build up the blood. They do this one thing and they do it well. They are for this reason an invaluable remedy in diseases arising from bad or deficient blood, as rheumatism, neuralgia, after-effects of the grip and fevers. The pills are guaranteed to be free from opiates or any harmful drug, and cannot injure the most delicate system. You can get Dr. Williams Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine, Co., Brockville, Ont.

Not to be Fooled

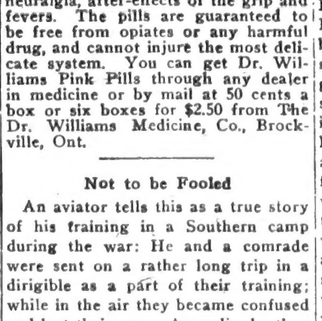

An aviator tells this as a true story of his training in a Southern camp during the war: He and a comrade were sent on a rather long trip in a dirigible as a part of their training; while in the air they became confused and lost their way. Accordingly, they descended until they could see a laborer at work just below them. Shutting off the engine, they waited until they were in hailing distance, and called out: "I say, where are we?" "You can't fool me. "You're up in that there balloon," was the unexpected reply.

Take Referendum in October

Monday, October 25, will see the fate of John Barleycorn, settled in Saskatchewan, as on that date the referendum will be taken to determine whether liquor imports shall be legal or not.

MOTHER!

"California Syrup of Figs" Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruity taste. Full directions on each bottle. You must say "California."

British Idealism

Growing Tendency Towards Loose Thinking and Loose Methods

There are strange forces at work in America making for its weakening, if not its destruction. Where these forces started from, how they are continued, will be difficult to say. Maybe it is simply a bubbling over of the third rate minds when given opportunity of free speech and more or less free action. I have reference to the tendency toward loose thinking and loose methods in social and industrial life. So many boys look upon work as abuse and they are often encouraged in this by their parents. They speak of life as a game of gambling variety and not something to be won by ability. It is now difficult even at high wages to secure more than 50 percent efficiency. Many are becoming very careless in their observance of the Sabbath, using it as a mere picnic day or time for brewing more trouble. They refuse to acknowledge duty. There is a propaganda abroad and being persistently continued to the effect that the way to develop individuality and strength in children is to let them have their own way and not discipline them or force them to accomplish given tasks. Learning no authority in the home, they resent authority outside and generally get into trouble themselves and make society a lot of trouble also. Our reformatories and prisons are decorated with the fruit of this sort of theory and yet some force is nursing the idea along. I wonder sometimes whether it is not related to the same institution which has endeavored for years past to weaken all America by creating a misunderstanding and bad blood between England and America. There are in the States many well-intended people who have been led by the frequent repetition of various forms of belittlement on the one hand and acknowledgements of superiority on the other to feel that England was a decadent nation from which little had come or was to be expected. I would remind them that the first bold stroke to representative government of the modern world started in England with the Magna Charta, 1215, that the creation of the United States of America, which was the boldest and most clean-cut step forward, giving men equal rights, in history up to that time, was of English origin. That of the 56 signers of the Declaration of Independence, every man was English except one, and he was a Scotchman. There were in the colonies at that time men from every other European nation but not one seems to have had the vision and the nerve to stand out and take his place in what meant either a hall of fame or an early grave. While it is a matter of record that to English or British idealism, we are indebted to the outstanding moral forces of the world today, such as organized war nursing (Florence Nightingale, 1820-1910), the Young Men's Christian Association (Williams, London, 1844), International Young Women's Christian Association (Lady Kinnaird, London, 1855-1877), Salvation Army (Booth, London, 1865), Boy Scouts (Baden-Powell, England, 1908), all these have become world-wide and powerful institutions for man's betterment. And growing out from these institutions or stimulated by them to be organized independently are a large number of lesser but nevertheless mighty valuable efforts. Imagine for a moment, friends, what America would be like with these agencies removed, and yet they all work today throughout the world. I am not an Englishman; I am an American of nine generations residence on this side of the water. It will do young boy scouts no harm whatever to remind them of this priceless heritage of idealism and to have them realize that their own organization is being classed among them; will not make then vain if properly told, but will challenge them and make them determined to carry on and achieve.—Professor R. M. Washburn, St. Paul.

Minard's Liniment Lumberman's Friend.

Insect Pests

European Corn Borer and Other Boring Caterpillers Easily Mistaken For It

In certain sections of the Eastern United States the notorious European Corn Borer has become established, and in view of the grave danger of this serious foreign pest being brought into Canada, the Entomological Branch of the Dominion Department of Agriculture, have issued a special circular dealing with this insect and others which bore in corn and which may be mistaken for it. This has been prepared by Mr. Arthur Gibson, chief of the division of field crop and garden insects. It comprises fourteen pages and has seven illustrations. A limited edition only of this circular has been printed. Agricultural workers and others specially interested may obtain copies free of charge on application to the publications branch, Department of Agriculture, Ottawa.

There are no beggars and few very wealthy people in Iceland, but the big majority are thrifty and prosperous.

W. N. U. 1317

A Fly Repellant

Mixture That Will Relieve Cows Of The Troublesome Pest

In the summer flies attack cows, causing much misery to them and financial loss to the owners. A contented cow always produces much more milk than a discontented one.

There are many so-called fly repellants on the market which are absolutely worthless. Good money is wasted every time these are produced. It is possible to obtain reliable repellents, however, and some of them are very cheap. Here is one recommended by the Utah Agricultural College: one pound of common laundry soap, four gallons of warm water, one gallon of crude petroleum and four ounces of powdered napthalin. Shave the soap into the warm water, and stir until it is thorough dissolved. Put the napthalin in the crude petroleum and stir it likewise until it is dissolved. Then pour the soap and water in the petroleum and napthalin and mix thoroughly.

Apply the solution with a brush to the parts of the cows' bodies which are attacked by flies. This solution has been used and found economical, effective and durable by many farmers.

Making the Streets Safe

The feature of the sittings of the spring assizes have been the large number of auto drivers charged with manslaughter as the result of the death of pedestrians killed by the cars they were driving. Four of these were convicted and one acquitted on his second trial. The list of convictions and sentences is as follows: Kenneth Ford, manslaughter, ten years; Alfred Simpson, manslaughter, with a strong recommendation for mercy, five years; Cecil Pynn, manslaughter, five years; Philip Schrodt, manslaughter, five years.—From the Vancouver World.

"Diamond Dyes" Make Old Apparel Fresh and Stylish

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods—dresses, blouses, stockings, skirts, children's coats, feathers' draperies, coverings—everything!

The Direction Book with each package tells how to diamond dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

Pasture for Hogs

Economical Production of Pork Depends Largely Upon Consumption of Cheaply Grown Feed

High prices for farm produce do not always mean large profits. Cost of production plays a very important part in determining the net profit a farmer makes on what he has to sell. This is a matter that should receive more attention than is being given to it. Manufacturers of articles that the farmer has to buy study the question of cost of production very carefully. The farmer is a manufacturer of the things the other fellow has to buy, and while he does little in the way of setting prices for his products, he could and should do more toward lessening production cost.

Take, as an example, the production of pork. Economical production of pork. Economical production of pork depends largely upon the consumption of cheaply grown feed. In the summer time hogs should be put on pasture. The pasture should be so managed that the forage produced will be clean, tender, and paltable. The idea that anything no matter how dirty, is good enough for hog feed is erroneous. While the hog will eats some dirty food, he will eat more and thrive better if he is given clean food and clean water. Such crops as alfalfa, clover, rape or peas and oats make good hog pasture. The pasture should not be overgrazed. It is best to divide the pasture into two or three equal areas and allow the hogs to remain in each a week or ten days. This will allow the first pastured area to recuperate before the hogs are turned in again.

Some grain also should be fed when hogs are on pasture. Opinions differ regarding the quantity that should be fed. A medium ration would be from two or three percent of the live weight of the hog. No fixed rule can be laid down regarding this. The pasture should be tender and clean, and enough grain should be fed to keep the hogs shapely and in thrifty, growing condition at all times.—By F. C. Nunnick.

Bolshevism and Democracy

Bolshevism is based on the exact opposite of democracy. Instead of a government of the people, by the people, and for the people, it is a system of class government of the proletariat carried out by means of force and terror. The fundamental principle of Bolshevism is the destruction of democracy, and the substitution for it by a class government instead of a government of all the people. — From a speech by Elihu Root.

Hares sleep with their eyes open, a thin membeRang replacing the eyelid which is missing.

Ships Given to Canada

Commander Hose Going to England For Battleships

Commander Hose, formerly in charge of the Rainbow, will leave shortly for England to arrange for the taking over of the three battleships which have been proferred to Canada by the Admiralty to form the nucleus for the Dominion navy. The vessels comprise one cruiser and two destroyers, and it is anticipated that they will arrive at Halifax early in July. The ships will be used primarily for training purposes until such time as Canada's permanent policy is decided upon, and more serviceable vessels are secured. They will probably be located at Halifax during the summer and at Esquimalt during the winter.

Schooner For Far North

The Alberta Motor Boat Company of Edmonton, is building a forty-foot schooner for use in the far north, the vessel to be equipped with a 12-horse gas engine as auxiliary power. The same company is building two gas boats for the Imperial Oil Company for use in northern oil exploitation.

On a first-class liner it is said that about 3,000 pieces of crockery are broken on each voyage.

Few men have faith enough to leave their umbrellas in the vestibule of a church.

Wash Day and Backache

WASH day is the least welcome day of the week in most homes, though sweeping day is not much better. Both days are most trying on the back.

The strain of washing, ironing and sweeping frequently deranges the kidneys. The system is poisoned and backaches, rheumatism, pains in the limbs result.

Kidney action must be aroused—the liver awakened to action and the bowels regulated by such treatment as Dr. Chase's Kidney-Liver Pills. This favorite prescription of the well-known Receipt Book author will not fail you in the hour of need.

One pill a dose, 25c a box at all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

READ EVERY LINE — DON'T MISS A WORD — BE HERE

There was a stampede of eager buyers every minute throughout the opening day of our UNLOADING SALE, which will be continued until we raise $10,000, if it takes every article in the store to do it. In many instances we are selling goods for just half their original wholesale cost. We try to make it a point to advertise the articles that we have the most of, it does not do to disappoint buyers from far away points, but on account of the hundreds of eager buyers, it means that you will have to be JOHNNY-ON-THE-SPOT, as each case is being unpacked and thrown on the bargain counters, until the high grade stock of Geo. Smith, Innisfail, is no more so far as Anderson-Rodgers is concerned. Our motto is "Small Profits and Quick Turn-Over" and we are doing it. On account of our great rush goods are unfolded and out of place in every department of the store, which makes it impossible to quote but very few prices for this week's paper.

WHOLESALE RETAIL

Local Notes

Remember D. A. Lothian's sale of household goods on Saturday May 29.

Gent's Rain coat lost in Lacombe or vicinity. Please leave at this office.

Kitchen Cabinets! A splendid Assortment to pick from. Get our prices. Morrison and Johnston, Ltd.

The monthly meeting of the Arbordale U.F.A. will be held at the home of Mr. and Mrs. F. Stewart on Monday evening, May 31st. A good programme is anticipated. Come one and and all, forget your cares and meet your neighbor.

D. A. Lothian's sale of household goods takes place on Saturday, May 29.

Rimbey Pioneer and Bentley Co-Operator Readers Notice

The Western Globe has taken over our mailing list until such a time as we resume business in the above two towns. We intend to open up again in the near future. Barney Halpin, Mgr

There will be a social and dance in Brookfield school house on June 11. Proceeds in aid of Gopher Tail Social, and other local institutions.

D. A. Lothian is holding a sale of household goods at his residence, Day Street on Saturday May 29th at 1 o'clock.

Furniture. New spring stock constantly arriving, prices right: At Lacombe Furniture Store.

The trial of the parties implicated in the riot at Rimbey a few weeks ago will be held before the judge early in June. The damage claims will also be brought forward at the same time. A session of the court will be held at Rimbey, as other cases in the district are before the court.

We are the agents for the De Laval Cream Separator. Let us show you this machine, also a full stock of repairs on hand—Morrison and Johnston, Ltd.

There is a record attendance at the Annual Bull Sale, which opened at the Exhibition Grounds this morning. The entries are equal in number to the city sales, and the quality of animals entered this year is of a high order. E. L. Richardson of Calgary with his staff of assistants are in charge of the sale.

Messrs. Scott and Reid are holding a great dispersion sale of Shorthorns and Herefords at the Exhibition grounds on Friday morning. A choice lot of animals are being offered for sale, and many buyers will remain over from the bull sale. C. F. Damron is in charge.

Bicycles! The best on the market. Special Price $55.00. Morrison and Johnston, Ltd.

Seeding is progressing rapidly throughout this district, and there will be a good average crop put in. The weather has been good for seeding. August Bruns has nearly 400 acres in already, and expects to get through in a few days. Grain is coming up well, and pasturage is good. No matter when we get spring in the Lacombe district, we always have a bumper crop, and this year will not prove any exception.

Automobile Tires! Dominion and Good Year. Morrison and Johnston, Ltd.

H. G. Morison, Manager of the Merchant's Bank, left for Toronto on Friday on a month's holiday. A. T. Richardson of Medicine Hat is relieving.

Just received a shipment of Rattan Chairs and Rockers. Morrison and Johnston, Ltd.

"Dealing With the Donkey"—a task which outlives the ape and the tiger. Evening service at Grace Methodist Church. Sunday at 7.30 p.m. Church school at 11 a.m.

Lakeside: Remember our new hour of service. Sunday School 1.30 p.m. prompt; Worship at 2.15 p.m. We shall welcome your presence.

On Tuesday June 1st, Lacombe people will have the chance to see the play put on by Clive Talent, entitled Me and Otis. This is going to be a scream from start to finish, and you will do well to witness it. The play is a four act comedy and you will get a thousand laughs in the two hours. The admission fee will be $1.00 and it is worth $10.00 and a person cannot possibly, get as much genuine fun and enjoyment out of a dollar any other way than seeing this play. This play was put on two nights in Clive and the hall was packed at both performances. Be there. Come and forget your troubles. Come early and avoid the rush.

The U. F. A. and U. F. W. A. of Progressive Union will meet at the home of P. Huseby on Tuesday evening, June 1st. A paper by one of the ladies will be given. The subject of Co-Operation will be discussed. You are welcome.

S. W. Paisley has a quantity of Timothy seed for sale.

A. T. and Miss Alice Inskip returned on Friday from an extended visit to England.

Our New Serial

Read the opening chapters of our new serial beginning in this issue, "Love of the Wild" by Archie P. McKishnie.

Blackfalds W. I.

Will anyone having cars who can convey the ladies out to the place of meeting kindly communicate with Mrs. Capron before Wednesday 2nd.

Ladies wishing to take advantage of the cars please let Mrs. Capron know before June 2nd. Cars will leave at 2 o'clock. Mary Brabury, Sec.-Treas.

Baseball—Baseball
By Barney

The Lacombe Baseball Team met defeat on the 24th in a game played here with Ponoka. Our boys, owing to lack of practice did not make a very good showing, and the wind that was blowing throughout the game was a great hinderance to good ball playing. The game went seven innings and it was not until after two of our men were put out in the final inning that Lacombe brought in a run. Carl Watt brought in the first run for Lacombe and he was followed over the home plate by Louis Calkins. These two runs saved Lacombe from being whitewashed. The score at the end of this game was 8 to 2.

Mention must be made of the lack of support given our baseball team by our local citizens. It is a disgrace to any town to have a ball team that is trying to put the town to the fore, and the town is not doing anything to help these boys out. The game on the 24th was better attended by Ponoka people than by people from our town. Twelve or more carloads of people were here from Ponoka to see the game and a large number from Ponoka came down on the train. A good local turnout gives the boys courage and they will play better if the ground is covered with local people rooting for them, and besides it takes money to keep a ball team. If this money is not forthcoming, the ball team must stop playing. If their games were well attended the gates would pay running expenses. Lacombe has joined the central Alberta League, and will play a game a week with the teams in this league during the season, besides playing exhibition games every now and then. We would like to see all their games well attended in the future. Will YOU ATTEND THEM. or Will you LET OUR TOWN BOOSTERS lose money in trying to boost the town.

Lincoln News

The district is very fortunate in at last having secured the services of J. M. Miller of the Presbyterian Church to hold a Divine Service in the Lincoln School house at 3.00 o'clock p.m. every Sunday until further notice. It is hoped that everyone will turn out now that much needed want is to be fulfilled. We once before remarked that a district without Divine Service was not complete and the Rev. Mr. Barr of Lacombe is making it his business to try and help us out. It is impossible to have a service of every denomination and although there may be people living here who are Church of England or Methodist we hope they will attend the meetings in the Lincoln School House and make so to speak a Union Service. Mr. Thomas A. Dutton is acting manager for Mr. Miller until other arrangements can be made and he will be pleased to receive any suggestiton for or against the time of service.

Considerable difficulty is being experienced these days in getting to town. The road at Roses Beaver Dam having been washed out it is necessary to either take a round about road, or unload ones wagon before attempting to cross at this point. Several mishaps have already happened but we sincerely hope that this danger spot will soon be fixed.

We are glad to see the ice on the lake breaking up. The strong gale during the last week crowded the ice well up on the shores in some places driving it well into the timber.

Mr. C. M. Carter is hard at it early and late these days. He has nearly all his land seeded.

Mr. C. D. Eadie is busy on his farm and has his hands full attending his mill and getting in his crop. Friday last was a tough day, but there is nothing will stop some people short of an earthquake.

Mr. Mueller from Wanatchi, Wash. has bought Mr. J. Wilson's farm and is busy getting in the crop. As soon as he has that done he will make a flying trip back to Washington to settle up his affairs, returning as soon as possible with his wife.

Mrs. O. Larsen of Alix was a visitor last week and was staying with Mr. and Mrs. Carter.

BY AEROPLANE TO PARIS.

A distinctly novel attraction has now been provided in the C.P.R. office windows at Charing Cross, an attraction which has been much admired by the crowds who have gathered to make inspection. The fine windows usually devoted to the exhibition of things Canadian is being occupied by an excellent model aerodrome of the Aircraft Transport and Travel, Limited, at Hendon, together with scientifically accurate models of various types of aeroplanes and airships.

Such a display in a railway and shipping office may seem rather unusual at first sight, but is really a sign of the times, also marking much enterprise on the part of the Dominion Express Company of Canada. Realising the importance of maintaining a really "Express" service, if its name is still to be justified, the Dominion Express Company, the premier Express Company in Canada, made arrangements to act as Passenger and Parcels Agents for the Aircraft Transport and Travel Limited on their London-Paris daily air service.

It is thus possible for either passengers or parcels to be booked for conveyance by aeroplane to or from London and Paris through any of the Dominion Express Company's offices in Europe, and these, in addition to London are to be found in important cities such as Liverpool, Glasgow, Manchester, Birmingham, Bristol and Paris.

The advantages of this arrangement are many, for the Dominion Express, holding as it does the exclusive right of shipping Express parcels over the entire C.P.R. system, as agents for the Aeroplane Service can ensure that an Express package scheduled to catch a certain ship actually reached its destination in Canada in the shortest possible space of time. As time is money nowadays, more than ever it was, it is easy to realise what an important adjunct an Air Service is to an Express Company.

The time-table shows that only 2¼ hours is occupied on the journey to or from London and Paris—urgent letters are carried at 2 shillings and 6 pence per ounce over the ordinary letter rate.

Parcels for delivery in Paris on the same day have to be handed in at the London office of the Dominion Express Company, 62-65, Charing Cross, London, S.W., before 10.30 a.m. The parcels rates range from 1s. 6d. to 2s. 6d. per lb. according to quantity, while special rates are quoted for large and regular consignments. The single fare for passengers is 15 guineas which includes a car to convey the passenger to Hounslow, the starting point. The Dominion Express Company's officials at Charing Cross have every reason to believe that a large proportion of Canadian visitors to Europe this year will take advantage of the ease with which it is now possible to book seats for a real flying visit to the Continent through their office. In fact, if they so wish, a motor car can pick them up at Trafalgar Square, and in under three hours they can be walking along the Champs Elysees.

Christy Bros. Shows.

To every reader of the Globe this announcement brings a message of supreme interest, a message fraught with tidings both great and joyous for on Friday June 4th, Christy Bros. greater United wild animal exhibition will give two performances, at 2 and 8 p.m., in Lacombe. Over a score of years Christy Bros. Shows have stood for all that has been biggest, best and supremely novel in the world of amusements. Beginning in a modest way, they have slowly but surely built up an institution of vast proportions so familiar to the American public in addition to introducing many innovations in the amusement world in form of splendid new methods of presenting arenic performances and magnificent pageantry. The Christy Bros. were the pioneers in a policy which insisted upon the public being treated with the utmost consideration. This year's programme offers many new features and displays, presenting scores of America's most famous artists, a colossal exposition of wild animal wonders from every clime; Clowns, a gay giddy and gladsome throng of earth's most ludicrous comedians, creating an endless chain of spontaneous side splitting laughter with their newest stunts and sketches Most unique congress of wild and domestic animals, superbly schooled in an endless variety of tricks and new attainments that will captivate the hearts of every man, woman and child.

"Marie Ltd., Synopsis

At the Rex Friday and Saturday

Alice Brady's latest Select Picture "Marie Ltd." will be seen on Friday and Saturday 28 and 29th at the Rex Theatre.

"Marie Ltd." is the story of a girl who gave up her career in life in order to try and repay her mother for having sent her through college. She takes a position in her mother's millinery establishment—a large, flourishing one on Fifth Avenue—where she attracts attention by her refined personality and startling beauty. Colonel Lambert an old rounder falls in love with her. Her mother favors the match but Diana does not love him and says she will not marry him. Blair Carson a young man whom Diana met on the train coming East, steps in at a very opportune moment and a threatening scandal is avoided. Happiness for all concerned is the result.

WANTED TO RUN AWAY

"I felt like running away as fast as I could."

This says Dorothy Phillips, the Universal star, was her feeling when she first found herself under the all seeing eye of the motion picture camera.

"The weird green lights, the bustle and bustle of the workers around the set, the camera that peied into one's very heart and mind, all bewildered me and brought me the determination that I would never again work before the Camera," she added.

That was four years ago. Today Miss Phillips is one of the world's foremost emotional stars of the screen, with a record of enviable successes to her credit. She is perfectly at home under the mercury lights and regards the camera as a kindly old optic which registers her grace and beauty securely and accurately for the pleasure of thousands upon thousands of playgoers. She will be seen in a duel role in "The Right to Happiness" which comes to the Rex next Monday and Tuesday, May 31st and June 1st.

Lacombe, Friday, June 4th

CANADA --- THE NEW SWITZERLAND

Where the Appetite is Always Keen.

Sections of the Alpine Club of Canada in all parts of the Dominion have received the anniversary message of the director, Arthur O. Wheeler, interprovincial boundary survey commissioner for B.C. There is much in this document of special interest to members of the club, but there is also a great deal which affects the general public, since it looks forward to a greatly increased tide of summer travel into the fastnesses of the great hills.

The director's message opens with comments on the prosperous standing of the club and the success of the camp at Yoho lake last summer. Thanks are also tendered to many who helped to make the camp successful. Mention is made of renewed photographic activities in the mountains and of the fact that the challenge cup for competition by amateur mountain photographers was won last summer by Dr. H. E. Bulyea of Edmonton.

With reference to the erection of a suitable memorial to the soldier members of the Alpine club, the director says: "It is decided to do this on two separate lines, first, to place a record of all our members on military service and particularly those who have joined the supreme honor roll, on the club house grounds at Banff, and second, the erection of a hut above timber line at some serviceable place in the Canadian Rockies for the use of our members and possibly the public who are interested in making mountain climbs."

With reference to independent mountaineering during the past year mention is made of the first ascents of Mt. King George, and several other peaks of the Royal Group, lying in a hitherto unexplored district fifty miles shouthwest of Banff. Mt. Sir Douglas and Mt. Joffre were also climbed for the first time last summer.

After some comment on the Banff winter carnival, in which the Alpine club takes an active interest, having been donors of a challenge cup for hockey, the director takes up the matter of the forthcoming "Welcome Home" camp to be held at Mt. Assiniboine from July 20th to 31st, 1920. At this camp more than 300 people will be placed under canvas and the special feature will be the fact that all returned members will attend as guests of the club. The camp will be situated three days' journey from the railroad and transportation of baggage will be by a specially organized pack train known as the "Alpine club pack train." Of special interest to the general public is the fact that this pack train will be in operation throughout the summer and anyone wishing to make a really interesting trip into the heart of the mountains can do so at a minimum expense. The camp at Mt. Assiniboine and the "Overnight Camps" on the way thither from Banff will be open to the public from the first of July until the end of September, except during the two weeks when they will be occupied by members of the Alpine club. At any time during the summer walking tours may be taken to Mount Assiniboine and these camps will be open to furnish good meals and a bed to the tramper at the end of his day's journey. There is only one way to really see the mountain and that is on foot, but so far this pleasure has been confined to the very few, on account of the difficulty of carrying food and bedding. These difficulties are now to be removed and it is planned in coming years to arrange many such walking and riding tours for the benefit of the public.

In conclusion the director quotes the verses of a gifted Calgary poetess, Miss Mariah L. Moodie:

Oh wind that comes out of the West,
the land of the sunset skies,
Where far o'er yon mountain's crest
those glorious colors rise,
You bring me the fragrance of pine,
the coolness of mountain snow,
The music of falling streams by the hills where the lilies grow.

Oh wind that comes out of the West,
you sigh on your way to the plain.
The mountain land is the best. Will you not come back again?
Glow skies with your golden light,
Blow softly wind from the hill
For my heart has a longing tonight,
that only the mountains can fill.

Mount Assiniboine, Canadian Pacific Rockies.

Farm Wanted

Time to Call A Halt

The great Hudson's Bay Company, the pioneer trading organization in this wonderful western land, is this year celebrating its 250th anniversary, and splendid pageants commemorating the event are being held in those cities which have developed out of the Company's old trading posts and forts. Participating in these pageants is Sir Robert Kindersley, the present governor of the Hudson's Bay Company, who is also director of the bank of England. Sir Robert is a man, therefore, who is fully conversant with present commercial and financial conditions throughout the world, and anything he may have to say on such subjects are worthy of the thoughtful attention and serious consideration of the people of Western Canada. In a recent address at Calgary he said:

"Unless we stop sailing along the smooth waters of this present false prosperity, brought about through inflation, which gives the world an additional purhasing power which is unreal, I say, if we don't stop now, we shall be faced with the most appalling financial crisis in the next five or six years that the world has ever seen. As a trader I speak to you, because I know, and I tell you that only one way remains for us to reach the goal we seek—prosperity and happiness—and that is for each and every one to devote their energies to a campaign of real productivity and for the elimination of consumption of all luxuries."

In uttering these words of warning, Sir Robert Kindersley is only repeating what the most astute and best informed men the world over have been saying and urging for some time past. Up to the present time, however, their words seem to have fallen on deaf ears. The situation in Canada is very similar to that in the United States, although possibly not quite so aggravated because in this country we suffered losses during the war out of all proportion to those sustained by the United States, while we did not profit to the same extent as our southern neighbors did.

Nevertheless, conditions on the North American continent are very similar, and here in Canada we may well heed the summing up of the difficulty in the United States as stated by one observant American writer when he says: "There is too much of spending and too little earning; too much extravagance and too little economy; too much restless and vague desire and too little real enjoyment."

Canada, like the United States, was settled by a sturdy, hard-working people. The fathers and grandfathers, the mothers and grandmothers, of the present generation of Canadians hewed down the forests of Ontario and Quebec and built their primitive homes. They worked hard, practiced economy, yet found real, deep and abiding joy in lives of achievement. The same process was followed by the pioneer settlers on these vast prairies. The rich men of Western Canada today came here as poor lads, and most of our merchant princes and well-to-do farmers can recall the days of almost abject poverty and unremitting toil.

It was these men and their equally courageous womenfolk who made Canada what it is. They knew nothing of the soft life. They all knew work, denial, hardship, and with it all deep enjoyment and good fun when there was time for it. But the fun was not the end which they sought. They knew nothing about taking something which someone else had created and sitting back to watch the money roll in and then spend it. Our foreign-born citizens came to Canada, not expecting a soft life, but a chance to work and get ahead in life.

It would almost seem as if the present generation of Canadians, and the newer settlers coming to our land, have forgotten these things. There would seem to be a real need for a realization of the truth that it is only by the continued practice of those qualities and the maintenance of those standards which made Canada what it is that this Dominion can be maintained and made still greater. If, says one writer, we could have some of the old-fashioned hard work, and saving and self-denial, we might also have some of the old-fashioned contentment and joy of living, instead of the unrest and discontent and constant seeking after leasure which does not seem to satisfy. The present generation has more than any other ever had, and it is bored to death. It seems to think that because everything isn't still softer, easier and still more perfect, that it is all wrong.

It is time for a revival of common sense, simple tastes and work and saving. If that revival does not come voluntarily, if such words of warning as uttered by Sir Robert Kindersley and a host of others are not heeded then hard times are ahead and many will in adversity and suffering regret that in these times they did not work, save and prepare for the future.

Natural Resources Mapped

Map Shows Clearly Where All The Natural Resources Are Situated

The natural resources intelligence branch of the Department of the Interior, of which F. C. G. Lynch is superintendent, is responsible for the publishing of a map which will prove of the utmost value to all those seeking information regarding the natural resources of Canada, together with the transportation at trade routes. A glance at the map shows clearly where all the vast natural resources are situated, whether in the shape of timber, coal, the precious metals, and pulp wood, furs, natural gas and oil, and clay belts, the enormous water powers throughout the country also being indicated.

Thus the seeker after information can find out merely by opening the map that in Nova Scotia and other Maritime provinces he can engage in mixed farming, mining and fishing; in Quebec he will find a wealth of timber for pulp wood, minerals to be dug from the earth, including asbestos, graphite, molybdenite; in the neighboring province of Ontario much the same possibilities exist, while in the prairie provinces of Manitoba, Saskatchewan, and Alberta, the possibilities of which have only been barely scratched, the intending settler prospector or business man will find himself surrounded with a veritable embarras de richesses. He can obtain large returns for his investment and labor either in grain growing, mixed farming, ranching, fishing, whilst the more adventurous can go further to the north and dig for the earth's hidden wealth or seek their fortune in the Hudson Bay. Then there are also shown the riches of British Columbia hidden in the mountainous fastnesses, whilst the lover of less adventurous avocations can revel in the fertile valleys of the Okanagan and other districts where a man and his family can live happily, peacefully and comfortably from the products of a five-acre orchard.

Ask for Minard's and take no other.

Hutterites Will Stay

Alberta Mennonites, known as Hutterites, will not trek to the Mississippi Valley with the Mennonite colonies of Manitoba and Saskatchewan, according to Jacob Wiff, head of the Southern Alberta colonies. Instead, they are remaining to plant the largest acreage they have yet sown.

Certain butterflies and caterpillars are never eaten by birds on account of their unpleasant taste.

Almost one-third of the surface of Newfoundland is covered by fresh water lakes.

Then and Now

A Few Incidentals That Have Added To the Happiness of the Human Race

Do you really want the "good old days" when there were no Pullmans, fast trains, anaesthetics, telephones, bicycles, automobiles, moving-pictures, self-binders, hay-loaders, cream separators, phonographs, cold storage, plate glass, gas cooking ranges, incandescent lights, aeroplanes, elevators, fast ocean liners, X-ray photography, typewriters, adding machines, cash registers, asphalt, microscopes, telescopes, linotypes, high speed presses, and automatic machines in almost every branch of endeavor? Think it over. Have these things not added something to the measure of human happiness.—From the Ottawa Journal.

One Great Essential To a Woman's Health Is Her Nerves

Nature intended women to be strong, healthy and happy as the day is long, instead of being sick and wretched. But how can any woman be healthy and happy when the whole nervous system is unstrung. The trouble is they pay more attention to their social and household duties than they do to their health. Is it any wonder then that they become irritable and nervous, have hot flushes, faint and dizzy spells, smothering and sinking spells, become weak and nervous, and everything in life becomes dark and gloomy.

Milburn's Heart and Nerve Pills are the very remedy that nervous, tired-out, weary women need to restore them to the blessings of good health.

Mrs. P. H. Ryan, Sand Point, N.S., writes: "I have been a great sufferer from nerve troubles. I was so weak and nervous I could not sleep at night and my appetite was very poor. I could not walk across the floor without trembling. I had hot flushes and fainting spells. When I was on my second box of Milburn's Heart and Nerve Pills I began to feel better and kept on until I had used six boxes, when I felt like a different person. I am never without them in the house and recommend them to all who suffer with their nerves."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Protection by Aircraft

Air Stations to Carry on Forest Fire Patrols in Western Canada

Forest fire patrols in the Rocky Mountains and on the Pacific coast will be undertaken shortly by government civil aid stations at Vancouver and at Morley, Alta.

From Vancouver, survey operations and forest fire patrols will be conducted for the Dominion and provincial governments; and from Morley, the Rocky Mountain forest reserve will be patrolled from the air and photographic and other surveys carried out. Preliminary arrangements to this end were discussed at a meeting of the air board.

In making appointments to these stations, the civil service commission will give preference to the men from the western provinces if they are of equal experience. Provision has been made for the issue of temporary permits for aircraft and military pilots from the United States, but these will not be permitted to carry passengers or freight for hire.

The air board has authorized an examination of northern Ontario with a view to the possibility of establishing emergency landing grounds on a commercial air route between eastern and western Canada.

Back to the Land

House Shortage Driving Families From the City

That the house shortage is boosting the "back-to-the-land" movement, and in turn is being relieved by the exodus of city people to the country, was the opinion expressed by officials of railway land departments. They estimated that altogether about 100 families a week have been leaving the city since the first of May.

"A large percentage of these would-be farmers are artists or salaried men who find that they can barely make ends meet on their pay," one man said. "They can make a living in the city, but they are not getting any farther ahead, and they believe that the country holds prospects for a brighter future.

"Another section consists of retired farmers," he continued, "who thought they had enough money to keep them the rest of their days, but they find it melting away in the city, so are going back to the farm. Most of these people intend to go in for mixed farming, but there are also a number anxious to try fruit farming in British Columbia. — Winnipeg Free Press.

Bamboo trees do not blossom till they are 30 years old.

SUNDAY SCHOOL LESSON

LESSON FOR MAY 30

JONATHAN AND HIS ARMOR-BEARER

I. Israel's Reduced Condition (vv. 1-3).

The Phillistine oppression had become so terrible that the king had only about 600 men, and they were completely disarmed, except that Saul and Jonathan had each a sword and spear. Lest the Israelites should make unto themselves swords and spears the Phillistines took from them their smiths; they only left them a file to sharpen their instruments of husbandry. This left them under the necessity of going to the Phillistines to have their tools sharpened. Saul himself was in hiding. Because he had presumptiously intruded into the priest's office God rejected him. While in this desperate condition God moved Jonathan to go against the Phillistines.

II. Description of the Passageway between Israel and the Phillistines (vv. 4, 5).

Over against the way which Jonathan and his armorbearer had to travel, on either side lay sharp rocks called Bozez and Seneh. The opposing camps were probably three miles apart. It required great effort to scale the cliff. The feat of Jonathan and his armorbearer was one of the most daring ever attempted.

III. Jonathan's Resolution to Go Against the Phillistines (vv. 6-10.)

1. Jonathan's summons to the young man (v. 6. Here the thought of verse one is resumed, verses two to five being parenthetical. Jonathan did not doubt but that the Lord was leading him. He recognized his covenant relationship with God, and therefore his claim upon him as against the uncircumcised Phillistines, asserting that "there is no restraint to the Lord to save by many or by few." God is all-powerful, so with him numbers cut no figure. Whatever he will for us he can do. One with God is a majority (Deut. 3: 30).

2. The noble response of his armorbearer (v. 7). He was actuated by the same faith and courage as Jonathan and entered heartily into the undertaking. When two agree together as touching anything in the name of Christ it shall be done (Matt. 18: 19-20).

3. Watching for the will of God (vv. 8-10). Doubtless the same spirit who had moved Jonathan to go had instructed him to watch for the Divine leading. The sign that God would deliver the Phillistines into their hands was the invitation for Jonathan and his companion to come up to the Phillistines. They did not go forward until the sign of divine leading was given.

IV. Jonathan's Marvelous Victory (vv. 11-16).

Being assured of the divine leading Jonathan and his armorbearer sprang forward saying that the Lord had delivered the enemy into the hands of Israel. He did not say "into our hands," but "into the hands of Israel." This is a fine touch of humility, it shows that it was zeal for God, not selfish ambition that impelled him to go forth. God interposed by a great earthquake, causing consternation among the Phillistines, moving them to destroy each other.

V. Saul's Foolish Behavior (vv. 17-46)

1. His carnal zeal (vv. 17-23). After the Lord had given the victory at the hands of Jonathan, Saul called for the ark of God to be brought, after which he went forth in pursuit of the enemy who had already been routed.

2. His foolish obligation imposed (vv. 24-30). It was that a curse would be upon any one of his soldiers who should stop to eat on that day. Fasting is proper at times, but it was the height of folly to demand strenuous service of his soldiers without the necessary nourishment.

3. His determination to kill Jonathan. Jonathan not having heard this rash oath, partook of the honey as he passed through the woods and was greatly refreshed. When this was reported to Saul he was about to take the life of his own son, who had so gloriously wrought in the deliverance of his people.

Keep Minard's Liniment in the house.

Motors on the Farms

The latest official statistics just published show that farmers in Ontario last year owned more passenger motor-cars than were owned in all the cities of the province; they also owned more than double the number of passenger cars owned in Toronto, and far outdistanced all other occupations in the number of cars owned by individual trades. The classification, according to occupation, shows 46,997 passenger cars and 825 trucks owned by farmers. Skilled trades come next with 15,042 passenger cars business men 13,838; doctors, 3,157; other professions, 5,119; manufacturers, 4,362.

Americans Coming to B.C.

A party of cattlemen from the state of Wyoming will visit central British Columbia in July or August with a view to obtaining large tracts of land for ranch stock.

It is estimated that the ash of the tobacco smoked in America yearly would furnish a most perfect fertilizer for 10,000 acres of land.

Cruelty in the Country

Old Methods Are Cause of Great Cruelty to Beasts

Custom is the perpetrator of many a cruelty. The farmer, unless he keeps up with the best farm literature, follows his father's methods, needlessly painful though they may be to the farm animals. Think of the millions of swine butchered in the old fashioned way—seized, "struck" and then left to stagger around and bleed to death. Many are doing this just as they did it a hundred years ago, in spite of the fact that intelligent farmers first drop the ammal by a small bullet rightly placed, destroying all consciousness, and then use the knife. The bleeding is in no way retarded by this plan.

Consider also the cruelty of dehorning cattle, prohibited by law in certain countries, when a little stick of caustic potash used on the week-old calf's head at the spots where the horns would grow, and causing almost no pain to the calf, would prevent the horn from growing at all. Moisten the place with your finger, dipped in water, and then rub with the potash till the skin simply begins to look red.

Docking the tails of lambs is another form of cruelty that the country is guilty of, probably because tradition says the wool will become less soiled. While farmers who have dared experiment by leaving their lamb's tails on, or have read of some one else who has, know better. Millions of sheep with tails cut off that might have been left on if their owners were seeking to accomplish the end for which they cut them off!

A MOTHER'S ADVICE

Once a mother has used Baby's Own Tablets for her little ones she is always happy to recommend them to others. Her advice, given after a careful trial, can be readily followed with assured good results. The Tablets are a mild but thorough laxative which never fail to regulate the bowels and sweeten the stomach. They always do good—they cannot possibly do harm even to the youngest babe. Concerning them Mrs. P. Laforest, St. Nazaire, Que., writes:—"For three months my baby was constipated and cried continually. On the advice of a friend I gave him Baby's Own Tablets and now at the age of five months he is perfectly well and weighs twenty pounds. I am delighted to be able to advise other mothers to use them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

A Wilderness Establishment

Stopping Place on Pas Trail Supplies Shelter But Not Food

Sam Cook is the keeper of a stopping place at Rocky Lake on the main winter trail in from the Pas in Manitoba to the Flin Flon mining country. He supplies shelter for man and beast—but no provender. Horse and dog teams transport their own feed. For the human travellers the Cook establishment provides dishes, water and fire only, the visitors doing their own cooking. If there is any food left the travellers usually leave it for their host. Cook keeps a set of books of a sort and these show that since November last, 1,600 freight teams, that is, horse-drawn outfits, and 1,500 dog teams have passed his place, and 932 men used his roof as shelter overnight. Cook collects 25 cents for each traveller that uses his cooking utensils. He says that business is looking so good as the result of the mining development that he is going to erect a much larger stopping place this summer, including a stable capable of giving shelter to 100 horses.

Wheat Price to Remain Higher

In the course of an interview at Winnipeg, Man. Hon. Edward Brown, provincial treasurer of Manitoba, expressed the belief that wheat would sell this fall at $3 a bushel and that the federal government would set the price again as was done last year.

In London there is a second hand book shop which contains over twenty miles of shelves carrying more than 1,000,000 books.

Auto speed limits in Japan vary with the width of the road.

Canadian Cheese For England

Export of Cheese Will Again Flow Through the Usual Channels

The Canadian minister of agriculture recently received the following cable from the British Ministry of Food: "It has now been definitely decided that the Ministry will not purchase the new season's Canadian cheese. The maximum importer's selling price (32 cents), now in force, will be removed at an early date, but the maximum retail price of one shilling and eight pence (40 cents) per pound for whole milk cheese will remain in force for the time being."

The effect of this decision will be that the export of cheese will again flow through the usual channels.

Delivery by Parachute

Grant Licenses Authorizing the Dropping of Packages by Parachute From Aircraft

The British Air Ministry has announced that, in an amendment of the air navigation regulations, licenses may now be obtained to drop packages by parachute. The amendment reads: "An amendment to the air navigation regulations dated 30th March provides that the Secretary of State may, on application being made to him, grant licenses to firms engaged in the aircraft industry, authorizing the dropping of packages by parachutes from aircraft on to dropping grounds approved by him for the purpose, subject to such conditions and for such time as may be specified in the license, and subject also to any directions issued by the Secretary of State for the purpose of supplementing or giving full effect to this proviso."

The Farm Workshop

It Pays to Have A Work Bench And A Kit of Tools

It is quite as necessary that a farmer should understand the use of tools and machinery as that he should be well posted in the principles of stock raising, grain growing or any other department intimately connected with his vocation. He should know when his mowing machine, hay rake, plow or other implements are not in proper adjustment, and be able to apply the remedy, and to be well enough posted to prevent being cheated when purchasing these implements.

It is now generally admitted that every farmer should own a good workshop. Build a place for the purpose, and get a kit of bench tools just as soon as the circumstances will permit of it; then a tool will be at hand when wanted, and nearly all the repairs upon farm implements and the buildings may be done without going to the expense of employing a professional mechanic.

There are rakes, and hay racks, sleds, wagon boxes, harrows, field rollers, etc., which may be kept in good order at the home workshop, and innumerable improvements made around the farm buildings. There are grain troughs to be made, barn doors to fix up by rehanging, stanchions to build or improve, weather boarding to be put on and roofs to mend, besides scores of other little necessities in and about the place for the convenience of the women folks as well as the men.

Any man of ordinary ability will be surprised after a little practice to find how much he is capable of doing. If he is a man in the habit of doing his work well, he will also have the satisfaction of knowing that he has saved a good, round bill at the village shop. A man cannot be called shrewd who goes one or two miles to have a new whiffletree made when he can work it himself in the time of going to the shop, to say nothing of having to pay for having it done besides.—Practical Farmer.

Inspection of Eggs

During the latter half of April, 45 cars of eggs, or approximately 650,000 dozens, were inspected under the Canadian egg regulations, twenty cars in the west and 25 in the east. Eleven of the eastern inspections were of cars shipped from Ontario points to Toronto, and of these six were graded extras and five graded firsts. A car of eggs contains from 450 to 500 cases, or 13,500 to 15,000 dozens. A striking feature is the demand for inspection of eggs being shipped within Ontario. Buyers and sellers, having seen the benefits of handling eggs according in inter-provincial trade, are quick to apply the same to shipments within the province. Inspection is by approval at point of shipment.

The Pleasure of Reading

Reading is a habit as easily cultivated as dancing and holds in a thrall as strong when once acquired. Books are now all that governesses used to be (though it's too bad governesses have gone out). They are companions, mentors and entertainers. They can show youth more of life than any pair of eyes can see on the great highway itself, and the view leaves no images to distort the maturer vision. Let's punch up the cushions in the window seat and call back the glory of the old sunlit scenes. It will be strange if the young folk don't forget all about the door.—Kansas City Star.

British Naval Supremacy

Britain Has Reason For Maintaining The Most Powerful Navy

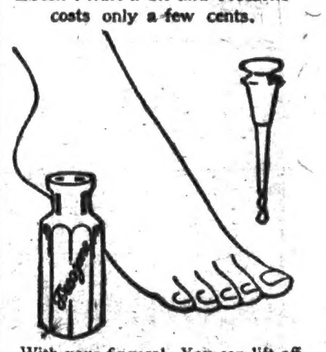

The addition of the five floating German dreadnoughts to the British fleet may save Britain from losing her naval supremacy to the United States during the next two or three years. At present Britain has 33 dreadnoughts. The United States has 27 built or building and is planning for 10 more. Britain has 13 battle-cruisers. The United States is building six and is planning for six more.

The justification for the intensive naval program of the United States is hard to find particularly when President Wilson urges all the nations of the world to join the League of Nations and agree to an all-round reduction of armaments. A clash between the two great divisions of the Anglo-Saxon race is unthinkable. Yet even the best friends of the United States who are citizens of the British empire feel that Britain occupies such a unique position in the world that she has reason for taking such steps as may be necessary to maintain the most powerful navy in the world.

The cost of naval construction keeps on multiplying. The British battleship Hood, with the extraordinary tonnage of 42,000, a length of 860 feet, 31 knots speed, and eight 15-inch guns, is costing thirty million dollars, and it is said that some of the American dreadnoughts now building are expected to cost more than forty million dollars. Recently Japan launched a dreadnought that will be much more costly than any vessel she previously has built.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callus. Instantly it stops hurting, then shortly you lift that bothersome corn or callus right off, root and all, without one bit of pain or soreness. Truly! No humbug!

Experimental Farm Wanted

So-Called Dry District in Southern Saskatchewan Should Be Served

For several years farmers in the south-western part of the province of Saskatchewan in what is called the dry district, have been clamoring for an experimental farm.

Prof. Bracken, of the agricultural college of Saskatoon, has records that show that in the north-eastern part of the province, where the rainfall is abundant, the average period between the late spring frosts and the first fall frosts was 73 days, and in the south-western part of the province 133 days. There is thus an opportunity to experiment with different crops where the district is frost free for 133 days, as compared with the experimental farms now located in the province at Indian Head, Rosthern and Scott.

At the meeting of delegates from Agricultural Societies in Saskatoon in January last a resolution was unanimously passed asking the Dominion government to establish an experimental farm in the south-western part of the province. Any location on the Shaunavon branch of the C.P.R. or in the Swift Current district, where the farmers have suffered the past two years on account of drought and hot winds, would be satisfactory.

Plant Potato Peelings

You can't eat your cake and have it too, but, according to gardening experts, you may eat your potato and plant it, too. The way to do it is to save the peelings of the potatoes that are to be boiled for the table, and plant the portions containing the eyes. With prices what they are it seems a criminal waste to cut up the whole potato for planting if it is not necessary to do so.—Woodstock Sentinel-Review.

How to Cure Biliousness

Doctors warn against remedies containing powerful drugs and alcohol. "The Extract of Roots, long known as Mother Seigel's Curative Syrup, has no dope or strong ingredients; it cures indigestion, biliousness and constipation. Can be had at any drug store." Get the genuine. 50c. and $1.00 Bottles. 8

No Cause for Alarm in Near East Situation

London.—In official circles today, there was an inclination to minimize the immediate gravity of the near eastern situation regarding the Bolsheviki situation. The Bolshevik forces landed at Enzeli are believed in official quarters not to exceed 10,000, which fact, it was considered, seemed to make any immediate extension of the operations contingent on the acquisition of large numbers of recruits for the pro-Bolsheviki elements in the Trans-Caucasus.

For this reason war office experts deemed it to be unlikely that any advance toward Teheran would be attempted as the Persian capital is more than 150 miles distant from Enzeli.

It was stated that the British troops which would be available for any operations against the Enzeli Bolsheviki forces consisted of a few thousand men now distributed among small and widely separated garrisons. The Anglo-Persian representatives were all agreed that they would wait until the results had been announced from the Enzeli district.

French Troops Leave Frankfort

No Incidences or Distrubances Were Noticed During Withdrawal of Troops

Coblenz.— Reports received from Mayence state that all French troops which have been in Frankfort and other centres, in the Main districts, had returned to the Mayence bridgehead. Five hours were required for the French and Belgian units east of the Rhine to withdraw. No incidences or disturbances were noticed during the day. Mayors of the smaller towns evacuated expressed approval of the attitude of the French upon withdrawing.

Stole Potatoes from Jail

Thieves Broke Into Shed In Which Supply of Vegetables Was Stored

Montreal. — While armed guards paced the walls of Bordeaux jail, so that the inmates might be in safe keeping, thieves sneaked up to a small shed in which the jail's supply of vegetables is stored and stole one hundred bags of potatoes. A hue and cry was immediately raised, and many residents in the vicinity, thinking that some dangerous criminal had escaped, took to cover.

In order to steal the spuds, a wagon or some other vehicle must have been used, and the police are doing their best to apprehend the villains who would deprive their fellow criminals of one of the necessities of life.

Big Increase in Trade

First Month of Fiscal Year Shows Increase of Nearly $33,000,000

Ottawa.—An increase of $32,663,172 in the grand total of Canadian trade for the month of April, the first month of the fiscal year, as compared with April, 1919, is shown by the trade items issued from the customs department. The trade of Canada during the past month reached a total value of $154,161,134, as compared with $121,527,962 for the same month a year ago.

Require Additional Half Million

Toronto.—Officials of the University of Toronto says the university will require $500,000 in addition to $400,000 which the legislature already has voted to that institution, a total of $900,000 this year being needed.

Income Tax Is Levied on Luxuries By New Budget

Ottawa. — A crowded house and crowded galleries welcomed Sir Henry Drayton, minister of finance, as he rose to make his first budget speech. Sir Henry dealt first with the economic situation of the Dominion. He emphasized prosperity in trade, the growth of revenue— last year's revenue of $388,000,000 was the best ever collected. He spoke of Canada's strong position in regard to currency.

Prior to stating his taxation proposals, Sir Henry gave an extensive review of the financial and economic position of the Dominion.

Conditions obtaining not only in Canada but all over the world, he said, were very different from the conditions which prevailed while the war was in progress, then the compelling necessity of the moment required the raising of large sums of money. It was absolutely imperative that there should be no check on production, no hindering of the war effort. Today, conditions were changed. The war was won. Expense was great. Canada, with other countries which participated in the titanic struggle, was faced with a pyramid of debt.

"The duty today," Sir Henry declared, "not only to carry on the government of the country with any additions to the debt, but on the other hand to promote measures which will reduce the nation's indebtedness."

The task, while heavy, was not so severe as the obstacles which Canada had overcome in the five years of war and stress.

"Indeed," Sir Henry proceeded, were it possible for the country again to become as united and earnest as it was during the war period, if it were possible for each and all of us to sink all differences, class and sectional interests and jealousies, into an effort towards re-establishing a Canada as united and co-ordinated as that which won the war, the task would indeed be easy and simple."

The following is a summary of the taxation proposals:

Luxury taxes.—Ten percent of the total purchase price on boots and shoes costing over $9 a pair, men's and boys' suits costing over $45; men's and women's overcoats costing over $50 each; fur coats and robes over $100 each; women's dresses over $45; women's suits over $60, and on hats, hose, neckwear, skirts, purses and gloves costing above certain specified figures, as well as on some other wearing apparel; all fans, opera cloaks, ivory-handled cutlery, cut glass ware, velvet and silk fabrics, lace, ribbons, silk embroideries and sporting goods.

Also on trunks over $40 each, and valises, suit cases, etc., over $25 each. This tax to be paid by the purchaser to the vendor at time of sale.

Ten percent on pleasure boats, yachts, canoes and motor boats; cameras, candy and confectionery, chewing gum, fire arms, shells, or cartridges; pianos, organs, musical instruments, and plated ware adapted for household use. This tax payable at the time of sale by Canadian manufacturers or when imported.

Twenty percent of total purchase price on such articles as cigar and cigaret holders and pipes costing over $2.50; humidors and other equipment for smokers; hunting, shooting and riding garments, fancy pocket-knives, gold, silver, ebony and ivory toilet ware; jewelry, articles of silver adapted for household or office use; fur wearing apparel (except as mentioned above), liveries, oriental rugs, expensive carpets, curtains and chandeliers, This tax payable by the purchaser at the time of purchase.

Twenty percent on mechanical player pianos, graphophones, and mechanical musical instruments, and on records used therewith.

Fifty percent on articles of gold for household use.

(Latter two taxes being payable at time of sale by manufacturer or when imported).

Playing cards, 25 cents a pack on cards selling at wholesale rates not over $25 per gross packs, and 50 cents a pack on cards above $25 per gross packs.

Beer, wines and spirits; increase in excise duties on beer of 30 cents a gallon; non-sparkling wines, 30 cents a gallon, and on sparkling wines, $3 a gallon.

Motor cars: Excise tax on Canadian manufactured and imported cars increased from ten to fifteen percent.

Sales tax: One percent on the sales of all manufacturers, wholesale dealers, jobbers or importers (not retailers). This tax not to apply to a large list of essential foodstuffs, cattle foods, anthracite or bituminous coal or to goods exported.

Stamp duties: Existing tax on cheques continued, but rate increased on bills of exchange and promissory notes. Two cents for bills of $100 or less, and two cents for each additional $100 or fractional part thereof.

Stamp duties on patent medicines, etc.: Henceforth to be affixed by manufacturer or importer, instead of retailer as now.

Film tax of 15 cents for each day used abolished because of inequality of incidence as between small and large theatres. All the above taxes are effective from the 19th instant.

Income tax: By last year's legislation income taxes payable this year on 1919 income were very substantially raised. A further general addition to these taxes of five percent is now added on incomes of $5,000 and up, to be effective this year.

British Naval Estimates

Great Britain Will Not Reduce Beyond Margin Fixed For Naval Safety

London.— Navy estimates for the new financial year under discussion in the house of commons endured a running criticism from a comparatively small number of members anxious to secure reduction of the various votes. Right Hon. Walter Long, first lord of the Admiralty, in reply, declared that no other department showed the same reduction as the admiralty, but the government was determined to do nothing to risk the navy being brought down below the margin that the admiralty was considering removing obstacles in the way of promotion from the lower deck to commissioned rank to which Geo. Barnes, former labor member in the cabinet, retorted:

"A lower deck boy has as much chance of getting commissioned rank as I have of entering the Kingdom of Heaven."

Almost simultaneously Lord Jellicoe, at the Guildhall, was referring to his tour of the Dominions. He said:

"It is an empire of which not only the inhabitants of these islands are proud, but those of the overseas dominions also. Our sea communications depend on the British navy and the navies of the dominions, which may be brought into existence to help the British navy. It is our duty to see that we are supreme in every weapon going to safeguard our communications."

West Should be Represented

Want Western Interests on Directorate of the C. N. R.

Calgary.— Resolutions urging that there should be representation of the western interests on the board of directors of the Canadian National Railway and that freight rates westward should be based on the same mileage rates as those eastward, and advantage taken of reduced cost of operating government lines through easy grades to the coast, were passed by the conference of representatives of western boards of trade.

A resolution urging the establishment of western executive offices for the railway was withdrawn.

W. E. Milner, of Winnipeg, spoke for the desirability of representations on the board of directors, arguing that much of the construction would be done in the west in the next ten years and that large parts and large revenue from the Western National railways came from the west.

P. J. Shallcross, of Victoria, believed that the great problems of the near future would be the devising of a cheap means of placing the wheat grown on the prairies on the markets of the world.

R. Moore, of Swift Current, questioned the wisdom of the first resolution, saying it would tend to create a cleavage between east and west.

Germany's Predicament

May be Compelled to Dispose of the State Owned Utilities to Secure Foreign Credits

Berlin.— If the state-owned public services continue to be run at a loss, the government will finally be compelled to transfer them to foreign corporations so that we may secure further foreign credits, Finance Minister Herr Wirth is reported to have said at an election campaign meeting at Dusseldorf.

The minister foreshadowed the formation of a great national trust corporation in which great industrial organizations would be incorporated with the one end in view—more foreign credits.

Minister of defence Gessler declared at a public meeting at Cologne, of the 14,000 officers left in the German army at the end of the war, 10,000 had been demobolized.

U. S. Naval Power

Washington.—Appointment of rear-admiral Sims, as honorary member of the British admiralty, was declined by the navy department as "un-American," despite the fact that it was prefered by King George himself, Secretary Daniels testified before a senate commission investigating the naval row. Mr. Daniels charged that this incident probably furnished some of the animosity between himself and the admiral.

Port Arthur Yards Closed

Port Arthur. — All unions at the Port Arthur shipyards are now on strike and there is not a wheel turning in the yards. The office staff will be kept on for some time and guards and fire protection will be increased.

The strike is over a request for a 17percent increase in wages. There have been no moves toward a compromise.

French Officers Acquitted

Paris.—Brig.-General Fournier, the commander of the French fortress commander of the French fortress at Maubeuge at the beginning of the war and six of his subordinates, court-martialled for surrendering to the Germans in September, 1914, were all acquitted.

W. N. U. 1317

Britain Resolved to Crush Seceders

If Army Not Enough the Government Will Ask For More

London.—The government's policy, whether the struggle be short or long, would be to employ the whole available forces and resources of the kingdom to restore order in Ireland, Baron Birkenhead, the lord chancellor announced in the house of lords. It would be the aim of the government in adopting this policy, he said, to render utterly impossible the existing campaign aiming at secession.

Considerable military reinforcements already have been sent to Ireland, the lord chancellor stated, and more would be sent as required.

He was speaking with authority and on behalf of the rest of his colleagues, he declared, when he said that if the existing military forces were insufficient, the government would hesitate as little to ask the country for more as it hesitated during the late war.

Discuss Oriental Question

Conference of Western Boards Of Trade Pass Resolution For Supply of Newsprint

Calgary.— The western boards of trade concluded their sessions here. The feature of the closing session was the discussion of the Oriental problem and the passage of a resolution urging the Dominion government to seriously consider the Oriental situation and to investigate the situation created by the passing into the hands of Japanese and Chinese of much of the rich lands of British Columbia and other parts of the west. The discussion on this arose at one stage to the point that if Japanese and Chinese were to be shut out from Citizenship, Canada might have to build up an army and navy to protect this principle.

Resolutions were passed demanding that the federal government secure an adequate supply of newsprint for the western papers at prices in keeping with tnose in the east; that the duty on livestock be suspended for a year to permit of building up of herds; that unsettled portions of the west be thrown open for grazing leases to British settlers; endorsing the appointment of a federal government purchasing commission and expressing disappointment of railway corporations getting exclusive rights to construct railway lines in any portion of the west.

Must Always be On Guard

Prepare in Peace to Meet Future Wars, Says Marshal Foch

Paris.—Warnings that France must, in the midst of peace, make preparation for future war, was uttered by Marshal Foch, who presided at the annual meeting of the polytechnic school for army engineers recently. Discussing lessons of the great war, he said the present economic struggle is the first part of the peace program, but preparation for war is the second part.

"Which of us," he asked, "dares believe Germany is renouncing war on the morrow of her ruin — Germany, which, inspired by sheer ambition, took up arms in 1864, 1866, 1870 and 1914, on the plea of historic necessity? Germany's neighbors, whether they wish to or not, will be forced to keep up armies and maintain strong frontiers, because, quite apart from the generous intentions of civilized humanity, there are historic realities and racial appetites, just as there are geographical realities.

"How can we help mistrusting a nation," he continued, "which reduced to impotence by the great Napoleon, was able by its martial ardor to re-establish itself and bring about complete overthrow of the colossal empire, and by superlative militarism and methodic development, extended its authority from the east Prussian marshes to beyond the Rhine? Making war is its national industry, and might is its right."

Marshal Foch paid a tribute to Marshal Joffre whose inspiration he declared brought to France the victory at the Marne.

Postmaster Salaries to be Discussed

Ottawa. — Postmasters from all parts of the Dominion were represented at a meeting of members of the commons. Western members have agreed to accompany a deputation of the rural postmasters to the civil service commission when the question of a fixed salary for postmasters will be taken up.

New Insurance Company

Ottawa.—An act to incorporate the United Canada Fire Insurance company, of Winnipeg, a new company with capitalization of $3,000,000 passed the select committee on banking and commerce.

Enquire Into Rents

Winnipeg. — At the instigation of the Women's Service League of the G.W.V.A., excessive rents will be the subject of an equiry to be instituted by the joint council of industry, it was announced

New Japanese Agreement

Anglo-Japanese Pact Avoids the Possibility of American Complications

Montreal.—The Montreal Star publishes the following London cable:

The new Anglo-Japanese agreement will prevent any possibility of Great Britain being drawn into war with the United States in the event of trouble between Japan and America, according to statements from an authoritative source. The Japanese and British foreign offices are now preparing amendments for inclusion in the new treaty which is being drawn.

The amendment over which Great Britain is mostly concerned is one covering article 4. This article provides that England and Japan decline to go to war in defence of each other against nations with which they have arbitration treaties. The British foreign office proposes to make it clear that this covers the Anglo-American treaty signed in 1914, which became effective subsequent to the signing of the original treaty with Japan. England has always insisted that this article covered the United States, but the changes in article 4 will make this more explicit.

Many Try to Join The Farmers' Party

W. R. Wood Declares Party Will Stick Absolutely to Action Taken at Brandon

Winnipeg.—"We are sticking absolutely to the action taken at Brandon," was the pronouncement of W. R. Wood, M.L.A., secretary of the United Farmers of Manitoba, when making a statement regarding the relation of the organization of candidates for constituencies in the coming provincial election.

"The truth is," said Wood, "that various parts of this province are today being over-run by political adventurers who have made up their minds that in a political way the present is a good fishing time for them. Chosen by themselves, or a small clique of personal cronies, they are at the opposite pole from the farmers in their thought of how a representative should be selected. They are profoundly convinced that the farmers' movement is one of the best things above ground in Canada to tie up to, and feel confident that the electors of this country are going to fall for the discredited stunt once more."

Officer Faces Charge of Forgery

New York.—Marcel G. Seeley, formerly a captain in the British Coldstream Guards, since his indictment years ago on the charge of forging a $6,500 draft, has surrendered to the police here. He was arraigned and held on $2,500 bail.

Seeley came here from Toronto to surrender. He advanced from private to captain in the war, in which he was wounded, gassed and shell-shocked.

Crop Prospects Are Bright

Report is Far More Cheerful Than Expected From Late Seeding

Winnipeg. — The Manitoba Free Press' first crop report for 1920 is a decidedly more cheerful document than might have been expected from the very late seeding. Perhaps its very best feature is in the fact that farmers are wise and are not attempting to go on seeding wheat after the middel of May. Speaking broadly, the supply of moisture is excellent, the soil in fine condition and growth very good, not a few districts are reporting wheat up two to four inches and no setbacks since seeding started.

Of course, there is a decrease in acreage in wheat, but, as that was to be expected, it is no surprise. As nearly as can be estimated from the returns (194 points have been heard from), the decrease is fifteen percent in Saskatchewan and ten percent in Manitoba and Alberta, or, in other words, in 1920 the acreage in wheat is something over 15,370,000 acres, as against 17,670,000 acres in 1919, and given a continuance of the present favorable conditions it will be quite possible for the west to reap more wheat from the reduced acreage than it did from the larger acreage of 1919.

The only disappointment in the report is the apparent small increase in coarse grains, the reports indicating that, while there may be some increases at many points there will be no increases at all. The increases will be mainly barley and flax.

Farmers are preparing to do extensive summerfallowing, which is a good thing and much needed after the war period.

Supplies of feed and labor are decidedly better than was anticipated, and horses are not in a poor condition for spring work, as might have been expected.

In the districts where there was hopper trouble last year, they were asked to report on that condition, and reports are uniformly to the effect that so far no trouble is indicated, and preparations are made for fighting it should it occur.

Soviet Warships Heavily Bombard Persian Port

London.—Thirteen Bolshevik warships appeared off Enzeli and began to bombard the town on the morning of May 19, says a Teheran despatch on that date to the London Times. A parliamenterie, who went in an open boat to enquire their object, was fire upon, his white flag possibly escaping notice.

A deputation, in behalf of the Persian government, including a British officer, proceeded in a large launch to board the flagship. The deputation was informed that the Bolsheviks demanded the surrender of the port owing to the presence there of Denikine's warships and troops. If it surrendered the Bolshevik fleet had no further hostile intention against the Persian government or the British garrison at Enzeli and was ready to give immunity to the interned Russian volunteers. The future of the port of Enzeli, it was stated, would be discussed between the Moscow Soviet and the British government.

"I understand," says the Times correspondent, "that a reply is being sent to the effect that Persia in interning and disarming Denikine's fleet and troops carried out in the strictest manner her obligations of neutrality, and protests against a gratuitous attack. Nevertheless if the Bolshevik commodore still contemplates danger from the interned ships, the Persian government is prepared to discuss the matter amicably and to take such measures as are necessary to remove apprehensions, the armistice being respected pending the discussion.

"Private reports from Baku describe several measures of repression there. It is said that an attempt to displace the Soviet government would be punished by hanging or imprisonment of those implicated. Admiral Sergieff, lately commanding Denikine's Caspian fleet, and other leading Russians have been hanged."

Feed Shortage is Feared

Reports Indicate Shortage Except In Northern Alberta And Saskatchewan

Ottawa— Present conditions indicate a short crop throughout Canada except in northern Alberta and northern Saskatchewan. From reports of the livestock branch and officials of the various provincial departments of agriculture indicate that unless an unusually poor growing season is experienced, with lack of moisture in the eastern provinces, and a lack of heat in the western provinces, there should be a sufficient supply of summer feed and pasturage to meet grazing requirements, and a reasonable amount of coarse grains and roughage for next winter's stock feeding operations. To offset this there will be considerably more sown in Ontario this spring, unless in the near future rains are experienced, to help hay and pasture lands. In western Canada a good deal of attention will, in any case, be given to the growing of soiling crops and crops for ensilage.

Heavy Fine for Smugglers

Eleven Men of Band of Whiskey Smugglers Arrested in Manitoba

Winnipeg.—Eleven men of the band of whiskey smugglers, captured while operating on the southern boundary of Manitoba have been fined a total of $6,400, it has been announced by Commissioner J. G. Rattray, of the provincial police.

Some of the men charged and convicted lived adjacent to the United States boundary. Although police have not troubled to obtain direct evidence to this point they strongly suspect the men disposed of their liquor shipments in the United States.

Turks Massing Against Greeks

40,000 Men To Resist Entry Into Thrace

Constantinople—Greek and Turkish troops have clashed about 25 miles east of Smyrna, where the Turks are taking the offensive and are apparently massing reinforcements preparatory to further advances against the Greeks. Fighting has occurred between Magniso and Menamen.

Jafar Tayat, Turkish commandant at Adrionople, has sent a message here from that city saying 40,000 of the Turks and Bulgarians are preparing to resist the Greeks. He declares they will meet the Greeks midway between Chatalja and Adrianople when the Greeks begin the occupation of Thrace.

Poles Are Driven Back

Warsaw. — The Bolsheviki have launched an attack on the northern front, between the river Dvina and Borisoff, and the Poles have been compelled to surrender ground in the face of superior forces, say an official communication issued.

The message adds that the fighting continues, but does not give the distance the Poles have withdrawn.

Grasshopper Feafs Less Acute

Winnipeg. — With ideal weather conditions prevailing and crops growing strongly, fears regarding the grasshopper menace in southwestern Manitoba are daily becoming less acute, according to the Hon. Valentine Winkler, who returned from a visit to rural districts.

Heavy Fine for Smugglers

Eleven Men of Band of Whiskey Smugglers Arrested in Manitoba

Winnipeg.—Eleven men of the band of whiskey smugglers, captured while operating on the southern boundary of Manitoba have been fined a total of $6,400, it has been announced by Commissioner J. G. Rattray, of the provincial police.

Some of the men charged and convicted lived adjacent to the United States boundary. Although police have not troubled to obtain direct evidence to this point they strongly suspect the men disposed of their liquor shipments in the United States.

Poles Receive No Help

War Materials Sent Were Bought in October, Says Bonar Law

London. — A question concerning war materials which are being shipped from England to Poland, was recently raised in the house. Andrew Bonar Law, the government spokesman, said they form a part of the supplies purchased by Poland last year and that they were being shipped to the Poles because they are the property of the Polish government. Mr. Bonar Law added that Great Britain had sold Poland some surplus stores last October and that would have been a breach of faith on the part of Great Britain if the despatch of munitions had been prevented. He declared that no assistance, field or otherwise, was being given Poland.

Assurance of Denikine's Safety

London.—It was officially announced that satisfactory assurances had been received from M. Tchitcherin, commissary for foreign affairs of Soviet Russia, regarding the safety of the remnant of the General Denikine's forces in the Crimea. It was stated peace negotiations will be opened immediately between the representatives of General Wrangel's army in the south and the Bolsheviki.

Canada to Send Representative

Ottawa.— In reply to P. R. Du Tremblay, "Laurier-Outremont," in the house, Sir Robert Borden announced that Canada would have a representative present at the final conference to decide the disposal of war indemnities to be paid by Germany.

Big Reduction In Clothing Prices In United States

New York. — Pursuant to their pledge to the federal reserve board, banking interests of this city have extended their campaign of deflation of credits and high commodity prices. In the financial district this policy has already been effective in reducing the speculative values to the extent of hundreds of millions of dollars in the last fortnight. In one instance, that of a prominent trust company, it is said that credits of this character had been reduced by $100,000,000 in the last three weeks.

Banks in the whole state have been proceeding along the same lines, and the pressure exerted by these institutions is said to be directly responsible for the wave of price cutting in many lines of retail trade, especially by the large departmental stores.

The president of a bank in the wholesale shoe district is authority for the statement that loans to dealers in leather and rubber goods are smaller now than at any period in the last 18 months.

The price-slashing movement appeared to have struck the west now. Paper's carry advertisements reading "Reductions of $20 to $70 in women's high class capes, cape wraps and wrap coats," "Fifty percent off on our entire stock of children's and misses' hats," "Any suit, coat or dress at half price," "At less than cost—remaining stock of spring dresses," appeared in one paper.

St. Paul, Minn.—Marked price reductions were announced by several St. Paul business establishments, one wholesale millinery concern, the largest in the northwest, announcing it would open it doors to the trade and dispose of its $1,300,000 stock at prices 50 percent or more below prevailing retail figures.

BENTLEY NEWS

The Annual meeting of the official board of the Bentley Church, for the finishing of the business of the year was held in Rainy Creek church on May 16th at 3 p.m. There was a good turnout of the members.

The report of the various societies were received and show a substantial increase over last year. The following amounts were raised during the year
Bentley Ladies Aid $213.85.
Rainy Creek Ladies Aid $58.62
Bentley Sunday school $97.58.
Rainy Creek Sunday School $32.48.
Woman's Missionary Society $76.20
Young People's Society $47.00
Sunshine Club (girls) $11.00.
Beside these amounts, Bentley Raised for Budget $1444.11. For new church seats $458.50. For Missions $77.25. Bible Society $27.00 Lords' Day Alliance $26.95. Forward movement $30.00. Rainy Creek raised For Budget $330.19. Missions 27.75 Lord's Day Alliance $8.75.

Total raised by Bentley $2510.44.
Total Raised by Rainy Creek $457.19.
Total raised by circuit $2967.34.
Which is $970.81 increase over last year or any previous year.

The average attendanec at the services at Bentley for the year was 50 and at Rainy Creek 27.

Beside the ordinary expenses of the year, $609.50 was expeneded on renovating and installing new seats in the Bentley church.

The financial statement was ordered printed, and given to each contributor

The Stewards elected were Mrs. H. W. Birch, Mrs. R. C. Miles and Mr. T. M. Lorimer, for Bentley and Mr. J. B. Dane and Miss Emma Nelson for Rainy Creek .Mr. F. W. Therp was elected treasurer. These with the following and the ministers and five representatives will constitute the official Board for the coming year.

Miss J. Young, Supt. and Mrs. Thorp Sr., Asst., of the Bentley S. S. Mr. J. B. Dane, Supt. and Douglas Wyatt Asst., of Rainy Creek S. S., Mrs. C. F. Damron and Mrs. E. J. Wyatt, Pres of Ladies Aid and Mrs. T. M. Lorimer President of the W.M.S.

The Annual Congregational meeting and Banquet was set for Tuesday June 22nd.

A new time table has gone into effect on the Lacombe and North Western Railway. The train will now run on Tuesdays and Fridays only as follows. Leave Rimbey 8.30 a.m., Forshee 9.15, Bentley 10.30, Aspen Beach 2.30 Bentley 3.15, Forshee 4.30, arriving at Rimbey 5.15.

The Merchants; Banks and Offices have agreed by common consent to close their places of business on Wednesday afternoon and evening during the month of June, July and August. This should not work any hardship on anyone and will give the town folk a breathing spell.

Rousing Bitterness

Marshall Foch has advised the people of France to prepare for another war. He does not suggest that there will be a second world conflict in the near future, but his judgment is that Germany has not learned her lesson and that it is only a question of time when she will make another effort to dominate European affairs by force of arms.

The marshall is a military man and thinks in terms of militarism. He has been trained that way and may be excused for that reason. Moreover, it must be admitted that history justifies him in assuming a defensive attitude with respect to Germany. Also there has been enough happened since the armistice in relation to the Germans and their lack of good faith to warrant a suspicion that the junker element in the fatherland is not content to pass out without a further struggle.

It is possible, too that Marshall Foch has his doubts as to the efficacy of the League of Nations as a means for the prevention of future wars. In this he is not alone. Much as we wish to have faith in this union of world powers for pacific ends, we are forced to doubt. Had the United States entered whole-heartedly into the arrangement it would have seemed more like a possibility. As it is there is great uncertainty as to the future of the league.

Such advice as that given by Marshall Foch is depressing to say the least. It may be that he is right, but we hate to think so. One thing is certain. In Germany there is a great mass of people, mostly among the workers who are much opposed to continuance of militarism. In the past this great mass has had no opportunity for expression of its opinion. It is different now, and the experience of the war has brought to these men and women a determination that things in the future shall be different for the fatherland. We may be sure that such talk as Marshall Foch has indulged in will be made much of by the junker party in Germany among the pacific workers. Every effort will be made to inflame their patriotism as against the French. It is to be hoped such effort will fail. If the League of Nations were functioning properly it certainly would fail.

Lost:—On road between Lacombe and Clive one travellers letter grip containing catalogues, etc. $10.00 reward. Finder please return to Hembury and Co., Lacombe, Alta.

NOTICE

In the estate of the late Lars Bjornson, deceased.

Notice is hereby given that all persons having claims upon the Estate of the above named Lars Bjornson, who died on the 20th day of January, 1920 are required to file with Bruce Howatt Barrister of Bentley, Alta., by the 8th day of June, 1920, a full statement duly verified of their claims and of any securities held by them, and that after that date the Executors will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been filed or which have been brought to their knowledge.

Dated this 19th day of May, 1920.
Bruce D. Howatt, Solicitor for the Executors, Bentley Alberta.

SUMMER SCHOOL July and August
MATRICULATION SCHOOL December to April
ALICE KING, Acting Registrar

Your Eyes

Do not neglect your eyes, your greatest asset. If you are troubled with headaches, in the majority of cases eye-strain is the cause. Have your eyes examined by a thoroughly competent graduate optician, who will fit you with the required glasses. We have one of the most complete Optical Parlors in the West, and you will find our prices reasonable.

PARSONS BROTHERS
JEWELERS AND OPTICIANS
Lacombe Alberta

VIKING—the Separator
Preferred by Women

The Viking Separator is the woman's choice. In designing this machine the manufacturers not only have in mind the attainment of skimming; but ease of operation; simplicity in construction and mechanical excellence.

VIKING CREAM SEPARATOR

It is easy to clean and keep sanitary. Built the correct height for comfortable operation. There is no leaning over to turn the crank.

Examine the illustration closely.

Come in and let us demonstrate a **Viking** to you.

HEMBURY and CO., Lacombe Alta.

St. Andrew's Presbyterian Church

Services Sunday May 30th.
